Certification Date: 24 Apr 2020

Expiration Date: 24 Apr 2025

# Certificate of Inspection

For ships on international voyages this certificate fulfills the requirements of SOLAS 74 as amended, regulation V/14, for a SAFE MANNING DOCUMENT

Vessel Name: **CBC 204**      Official Number: **1027572**      IMO Number:      Call Sign:      Service: **Tank Barge**

Hailing Port: **NEW ORLEANS, LA**      Hull Material: **Steel**      Horsepower:      Propulsion:      **UNITED STATES**

Place Built: **GULFPORT MS**      Delivery Date: **14 Jul 1995**      Keel Laid Date:      Gross Tons: **R-1061**      Net Tons: **R-1061**      DWT:      Length: **R-195.0**  
**UNITED STATES**      **14 Jul 1995**      **R-1061**      **R-1061**      **10**

Owner: **CANAL BARGE COMPANY INC**  
**1801 ENGINEERS RD**  
**BELLE CHASSE, LA 70037**  
**UNITED STATES**

Operator: **CANAL BARGE COMPANY**  
**1801 ENGINEERS ROAD**  
**BELLE CHASSE, LA 70037**  
**UNITED STATES**

This vessel must be manned with the following licensed and unlicensed Personnel. Included in which there must be 0 Certified Lifeboatmen, 0 Certified Tankermen, 0 HSC Type Rating, and 0 GMDSS Operators.

0 Masters	0 Licensed Mates	0 Chief Engineers	0 Oilers
0 Chief Mates	0 First Class Pilots	0 First Assistant Engineers	
0 Second Mates	0 Radio Officers	0 Second Assistant Engineers	
0 Third Mates	0 Able Seamen	0 Third Assistant Engineers	
0 Master First Class Pilot	0 Ordinary Seamen	0 Licensed Engineers	
0 Mate First Class Pilots	0 Deckhands	0 Qualified Member Engineer	

In addition, this vessel may carry 0 Passengers, 0 Other Persons in crew, 0 Persons in addition to crew, and no Others. Total Persons allowed: 0

Route Permitted And Conditions Of Operation:  
**---Lakes, Bays, and Sounds---**

Also, in fair weather only, coastwise, not more than twelve (12) miles from shore between St. Marks and Carrabelle, Florida.

This vessel has been granted a fresh water service examination interval in accordance with 46 CFR 31.10-21(a) (2). If this vessel is operated in salt water more than 6 months in any 12 month period, the vessel must be inspected using salt water intervals as per 46 CFR 31.10-21(a)(1), and the cognizant OCMI must be notified in writing as soon as this change in status occurs.

This tank barge is participating in the Eighth and Ninth Coast Guard District's Tank Barge Streamlined

\*\*\*SEE NEXT PAGE FOR ADDITIONAL CERTIFICATE INFORMATION\*\*\*

With this Inspection for Certification having been completed at Houston, TX, UNITED STATES, the Officer in Charge, Marine Inspection, Sector Houston-Galveston certified the vessel, in all respects, is in conformity with the applicable vessel inspection laws and the rules and regulations prescribed thereunder.

II	2018	9ft 0in	13.6	LBS
III	2667	11ft 0in	13.6	LBS

**\*Conditions Of Carriage\***

Only those cargoes named in the vessel's Cargo Authority Attachment (CAA), serial # C1-1203357 dated July 20, 2012, may be carried and then only in the tanks indicated.

When the vessel is carrying cargoes containing greater than 0.5% benzene, the person in charge is responsible for ensuring the provisions of 46 CFR 197, Subpart C are applicable.

As per 46 CFR 150.130, the Person In Charge of the vessel is responsible for ensuring that the compatibility requirements of 46 CFR, Part150, are met. Cargoes must be checked for compatibility using the figures, tables, and appendices of 46 CFR, Part 150, in conjunction with the reactive group numbers from the "Compat Group No" column listed in the vessel's Cargo Authority.

**\*VAPOR CONTROL AUTHORIZATION\***

In accordance with 46 CFR 39, excluding 46 CFR 39.40, this vessel's vapor control system has been inspected to the plans approved by Marine Safety Center letter Serial C2-9500963 dated March 16, 1995 and Serial C1-1203357 dated July 20, 2012, and found acceptable for collection of bulk liquid cargo vapors annotated with "Yes" in the CAA's VCS column.

**\*STABILITY AND TRIM\***

Cargo tanks must be loaded uniformly whenever a 46 CFR Subchapter "O" cargo is carried; for trim purposes, the weight of

# Certificate of Inspection

Vessel Name: CBC 204

cargo in each tank may exceed the uniformly loaded tank cargo weight by at most 5 percent.

In accordance with 46 CFR Part 39.5000, this vessel's VCS has been evaluated and approved for multi-breasted tandem loading with other vessels specifically approved by Marine Safety Center letter Serial No. C2-2100330 dated February 4, 2021.

Shipyard: Trinity Marine Group

Hull #: 1485

### 46 CFR 151 Tank Group Characteristics

Tank Group Information		Cargo Identification			Hull Type	Tanks			Cargo Transfer		Environmental Control		Fire Protection Provided	Special Requirements			Elec Haz	Temp Cont
Tank Grp	Tanks In Group	Density	Press.	Temp.		Cargo Ssg Tank	Type	Vent	Gauge	Pipe Class	Cont	Tanks		Handling Space	General	Materials of Construction		
A	1C, 2P/S, 3P/S, 4C	13.8	Atmos.	Amb.	II	1# 2#	Integral Gravity	PV	Closed	II	G-1	NR	NA	Portable	.50-60, .50-70(a), .50-70(b), .50-73, 55-1(b), (c), (e), (f), (h), (i), 55-1(a), (b), (c), (d), (g), (f), (g).	NR	No	

- Notes: 1. Under Environmental Control, Tanks, NR means that the tank group is suitable only for those cargoes which require no environmental control in the cargo tanks.  
 2. Under Environmental Control, Handling Space, NR means that the tank group is suitable only for those cargoes which require no environmental control in the cargo handling space. NA means that the vessel does not have a cargo control space, and this requirement is not applied.  
 3. Under Electrical Hazard Class, NA means that the tank group is suitable only for those cargoes which have no electrical hazard class requirement. NR means that the vessel has no electrical equipment located in a hazardous location.

## Cargo Authority Attachment

Vessel Name: CBC 204  
Official #: 1027572

Shipyard: Trinity Marine  
Hull #: 1465

### Explanation of terms & symbols used in the Table:

#### Cargo Identification

<b>Name</b>	The proper shipping name as listed in 46 CFR Table 30.25-1, 46 CFR Table 151.05, and 46 CFR Part 153 Table 2.
<b>Chem Code</b> none	The three letter designation assigned to the cargo in the Chemical Hazards Response Information System (CHRIS) Manual. Certain mixtures of cargoes may not have a CHRIS Code assigned.
<b>Compatibility Group No.</b>	The cargo reactive group assigned for compatibility determinations in 46 CFR Part 150 Tables I and II. In accordance with 46 CFR 150.130, the Person-in-Charge of the barge is responsible for ensuring that the compatibility requirements of 46 CFR Part 150 are met. Cargoes must be checked for compatibility using the figures, tables, and appendices of 46 CFR 150 in conjunction with the assigned reactive group number. Because of the very high reactivity or unusual conditions of carriage or potential compatibility problems, this product is not assigned to a specific group in the Compatibility Chart. For additional compatibility information, contact Commandant (CG-3PSO-3), U.S. Coast Guard, 2100 Second Street, SW, Washington, DC 20593-0001. Telephone (202) 372-1425. See Appendix I to 46 CFR Part 150 - exceptions to the compatibility chart.
<b>Note 1</b>	
<b>Note 2</b>	
<b>Subchapter</b> Subchapter D Subchapter O Note 3	The subchapter in Title 46 Code of Federal Regulations under which the cargo has been classified. Those flammable and combustible liquids listed in 46 CFR Table 30.25-1. Those hazardous cargoes listed in 46 CFR Table 151.05 and 46 CFR Part 153 Table 2. These cargoes listed in 46 CFR Part 153 Table 2 are non-regulated cargoes when carried in bulk on non-oozing barges.
<b>Grade</b>	The cargo classification assigned to each flammable or combustible liquid. Grades inside of "( )" indicate a provisional assignment based upon literature sources which were not verified by manufacturers data. The Person-in-Charge shall verify the cargo grade based on Manufacturers data and ensure that the barge is authorized for carriage of that grade of cargo. Flammable liquid cargoes, as defined in 46 CFR 30-10.22. Combustible liquid cargoes, as defined in 46 CFR 30-10.15. The flammability/combustibility grade of these cargoes may vary depending upon the flashpoint and Reid vapor pressure. The Person-in-Charge shall verify the cargo grade based on Manufacturers data and ensure that the barge is authorized for carriage of that grade of cargo. Those subchapter O cargoes which are not classified as a flammable or combustible liquid. No flammability/combustibility grade has been assigned yet, as the necessary flash point/vapor pressure data for such assignments are presently not available.
<b>A, B, C</b> <b>D, E</b> Note 4	
<b>NA</b> S	
<b>Hull Type</b> I II III NA	The required barge hull classification for carriage of the specified Subchapter O hazardous material cargo, see 46 CFR 151.10-1. Designed to carry products which require the maximum preventive measures to preclude the uncontrolled release of the cargo. See 46 CFR 151.10-1(b)(1). Designed to carry products which require significant preventive measures to preclude the uncontrolled release of cargo. See 46 CFR 151.10-1(b)(3). Designed to carry products of sufficient hazard to require a moderate degree of control. See 46 CFR 151.10-1(b)(4). Not applicable to barges certified under Subchapter D.

#### Conditions of Carriage

<b>Tank Group</b>	The vessel's tank group (as defined in Section 4) which is authorized for carriage of the named cargo.
<b>Vapor Recovery</b> Approved (Y or N)	Yes: The vessel's VCS has been reviewed and approved by the MSC to control vapors of the specified cargo. No: The vessel's VCS has been reviewed and is not approved by the MSC to control vapors of the specified cargo.

#### Conditions of Carriage

<b>Tank Group</b>	The vessel's tank group (as defined under the "46 CFR Tank Group Characteristics" listed on page 1) which is authorized for carriage of the named cargo.
<b>Vapor Recovery</b> Approved (Y or N)	Yes: The vessel's VCS has been reviewed and approved by the MSC to control vapors of the specified cargo. No: The vessel's VCS has been reviewed and is not approved by the MSC to control vapors of the specified cargo.

#### VCS Category:

<b>Category 1</b>	The specified cargo's provisional classification for vapor control systems. (No additional VCS requirements above those for benzene, gasoline and crude oil) All requirements applying to the handling of oil and hazardous materials in Titles 33 and 46 Code of Federal Regulations (CFR) apply to these cargoes. Those specifically dealing with vapor control systems are in 33 CFR 155.750, 33 CFR 156.120, 33 CFR 156.170, 46 CFR 35.35 and 46 CFR 30. This cargo tank venting system calculations (46 CFR 39.20-11) and the pressure drop calculations (46 CFR 30.30-1(b)) must use appropriate friction factors, vapor densities and vapor growth rates.
<b>Category 2</b>	(Polymers) Polymerization and residue build-up of these cargoes can adversely affect the vessel by fouling safety components and restricting vapor flow which could lead to cargo tank overpressurization. The vessel's owner must develop a method of ensuring all VCS safety components are functional and polymer build-up is not causing an unsafe condition due to increased pressure in the vapor control piping and cargo tanks. The method shall be acceptable to the local Officer in Charge, Marine Inspection. This is in addition to the requirements of Category 1. Please note that a material not normally considered a monomer can be a problem in detonation arrester.
<b>Category 3</b>	(Highly toxic) VCSs for these toxic cargoes cannot use a spill valve or rupture disk as the primary means to meet the overall protection requirement of 46 CFR 39.20-9. This requirement is in addition to the requirements of Category 1.
<b>Category 4</b>	(Polymers and highly toxic) Must comply with requirements of Categories 1, 2 and 3.
<b>Category 5</b>	(High vapor pressure) VCS pressure drop calculations for cargoes with a vapor pressure greater than 14.7 psia at 115 F must take into account increased vapor-air mixture densities and vapor growth rates as compared to Category 1 cargoes. Consult the Marine Safety Center's VCS Guidelines for further information. This requirement is in addition to the requirements of Category 1.
<b>Category 6</b>	(High vapor pressure and highly toxic) Must comply with requirements of Categories 1, 3 and 5.
<b>Category 7</b>	(High vapor pressure and polymers) Must comply with requirements of Categories 1, 2 and 5.
<b>none</b>	The cargo has not been evaluated/classified for use in vapor control systems
