111	2254	11ft 6in	15.0	Rivers, Lakes, Bays and Sounds

Conditions Of Carriage

Only those cargoes named in the vessel's Cargo Authority Attachment, serial #C1-0203398 dated October 8, 2002 may be carried and then only in those tanks indicated.

Per 46 CFR 150.130, the Person In Charge of the barge (vessel) is responsible for ensuring that the compatibility requirements of 46 CFR 150 are met. Cargoes must be checked for compatibility using the figures, tables, and appendicies of 46 CFR 150 in conjuction with the reactive group numbers from the "COMPAT GROUP NO" column listed in the vessel's Cargo Authority Attachment.

In accordance with 46 CFR Part 39, excluding part 39.4000, this vessel's vapor control system has been inspected to the plans approved by the Marine Safety Center letter serial # C1-0203398 dated October 8, 2002, E2-0202475 dated July 23, 2002, and C2-0201699 dated May 29, 2002 and found acceptable for the collection of bulk liquid cargo vapors annotated with "Yes" in the CAA's VCS column.

As per 46 CFR Part 39.1017 and 39.5000(e), this vessel's VCS has been evaluated and Approved for multi-breasted tandem loading with other vessels specifically approved by Marine Safety Center letter Serial No. C1-2202328 dated July 15,2022.

Notes: 1. Under Environmental Control. Tanks, NR means that the tank crows is suitable only for those carooss which require no anyronmental control in the caroo tanks

- 2. Under Environmental Control, Handling Space, NR means that the tank group is suitable only for those cargoes which require no environmental control in the cargo handling space. NA means that the vessel does not have a cargo control space, and this requirement is not applied.
- 3. Under Electrical Hazard Class, NA means that the tank group is suitable only for those cargoes which have no electrical hazard class requirement. NR means that the vessel has no electrical equipment located in a hazardous location.

Certificate of Inspection Cargo Authority Attachment

Vessel Name: CBC 7032

Official #:

Page 8 of 8

Shipyard: Trinity Madison

Hull #: 2109-2

Explanation of terms & symbols used in the Table:

Cargo Identification

Name Chem Code The proper shipping name as listed in 46 CFR Table 30.25-1, 46 CFR Table 151.05, and 46 CFR Part 153 Table 2. The three letter designation assigned to the cargo in the Chemical Hazards Response Information System (CHRIS) Manual,

Certain mixtures of cargoes may not have a CHRIS Code assigned.

Compatability Group No.

The cargo reactive group number assigned for compatibility determinations in 48 CFR Part 150 Tables I and II. In accordance with 46 CFR 150.130, the Person-in-Charge of the barge is responsible for ensuring that the competibility requirements of 48 CFR Part 150 are met. Cargoes must be checked for competibility using the figures, tables, and appendices of 46 CFR 150 in conjunction with the assigned reactive group number.

Note 1

Because of the very high reactivity or unusual conditions of carriage or potential compatibility problems, this product is not assigned to a specific group in the Compatibility

additional compatibility information, contact Commandant (G-MSO-3), U.S. Coast Guard, 2100 Second. Street, SW, Washington, DC. 20593-0001. Telephone (202) 267-1217.

Subchapter

Note 2

Subchapter D Subchapter O

Note 3

The subchapter in Title 46 Code of Federal Regulations under which the cargo has been classified Those flammable and combustible liquids listed in 46 CFR Table 30.25-1.

Those hazardous cargoes listed in 48 CFR Table 151.05 and 46 CFR Part 153 Table 2.

Those cargoes listed in 46 CFR Part 153 Table 2 are non-regulated cargoos when carried in bulk on non-oceangoing barges.

Grade

The cargo classification assigned to each fiammable or combustible liquid. Grados inside of "{ }" Indicate a provisional assignment based upon literature sources which were not verified by manufacturers data. The Person-in-Charge shall verify the cargo grade based on Manufacturers data and ensure that the barge is authorized for carriago of that grade of cargo.

A. B. C Note 4 Flammable liquid cargoos, as defined in 46 CFR 30-10.22

Combustible fliquid cargoes, as defined in 48 CFR 30-10.15.

The flammability/combustibility grade of those cargoes may vary depending upon the flashpoint and Reid vapor pressure. The Person-in-Charge shall verify the

cargo grade based on Manufacturers data and ensure that the barge is authorized for carriage of that grade of cargo.

NA

Those subchapter O cargoes which are not classified as a flammable or combustible tiguid.

No flammability/combustibility grade has been assigned yet as the necessary flash point/vapor pressure data for such assignments are presently not available.

Hull Type

NA

The required barge hull classification for carriage of the specified Subchapter O hazardous material cargo, see 46 CFR 151,10-1.

Designed to carry products which require the maximum preventive measures to preclude the uncontrolled release of the cargo. See 46 CFR 151.10-1(b)(1). Designed to carry products which require significant preventive measures to preclude the uncontrolled release of cargo. See 48 CFR 151.10-1(b)(3). Designed to carry products of sufficeint hozard to require a moderate degree of control. See 48 CFR 151.10-1(b)(4).

Not applicable to barges cortificated under Subchapter D.

Conditions of Carriage

Tank Group Approved (Y or N)

The vessel's tank group (as defined in Section 4) which is authorized for carriage of the named cargo.

Yes: The vessel's VCS has been reviewed and approved by the MSC to control vapors of the specified loanger No: The vessel's VCS has been reviewed and is not approved by the MSC to control vapors of the specified cargo.

Conditions of Carriage

Tank Group Vapor Recover Approved (Y or N) The vesset's tank group (as defined under the "48 CFR Tank Group Characteristics" listed on page 1) which is authorized for carriage of the named cargo

Yes: The vesset's VCS has been reviewed and approved by the MSC to control vapors of the specified cargo. No: The vessel's VCS has been reviewed and is not approved by the MSC to control vapors of the specified cargo.

VCS Category:

The specified carge's provisional classification for vapor central systems

Category 1

(No additional VCS requirements above those for benzene, gasolines and crude oil) All requirements applying to the handling of oil and hazardous materials in Titles 33 and 48 Code of Federal Regulations (CFR) apply to these cargoes. Those specifically dealing with vapor control systems are in 33 CFR 155.750, 33 CFR 156.120, 33 CFR 156.170, 48 CFR 35.35 and 46 CFR 39. The cargo tank venting system calculations (48 CFR 39.20-11) and the pressure drop calculations (48 CFR 39.30-1(b)) must use appropriate friction factors, vapor densities and vapor growth rates.

Category 2

(Polymerizes) Polymerization and residue build-up of these cargoes can adversely affect the vessel by fouling safety componenets and restricting vapor flow which could lead to cargo tank overpressurtzation. The vessel's owner must develop a method of ensuring all VCS safety components are functional and polymer build-up is not causing an unsafe condition due to increased pressure in the vapor control piping and cargo lanks. The method shall be acceptable to the local Officer in Charge, Marine Inspection. This is in addition to the requirements of Category 1. Please note that a material not normally considered a monomer can be a problem in detonation arroster

Category 3

(Highly toxic) VCSs for these toxic cargoes cannot use a spill valve or rupture disk as the primary means to meet the overful protection requirement of 46 CFR 39.20-9

This requirement is in addition to the requirements of Category 1

Category 4

(Polymerizes and highly toxic) Must comply with requirements of Categories 1, 2 and 3.

Category 5

(High vapor pressure) VCS pressure drop calculations for cargoes with a vapor pressure greater than 14.7 psia at 115 F must take into account increased vapor-air mixture densities and vapor growth rates as compared to Category 1 cargoes. Consult the Marino Safety Center's VCS Guidelines for further information. This requirement is in addition to the requirements of Category 1.

Category 5 Category 7

(High vapor pressure and highly toxic) Must comply with requirements of Categories 1, 3 and 5. (High vapor pressure and polymerizes) Must comply with requirements of Categories 1, 2 and 5

The cargo has not been evaluated/classified for use in vapor control systems
