What We Do

Real World Experience

Our advisors have walked in your shoes. We understand the demands of keeping customers satisfied, maintaining quality, meeting investor expectations, and engaging and aligning the right talent while keeping pace with rapid change.

Model-Driven Assessment

Unlocking Higher Levels of Value

Struggling with delayed product launches or quality issues affecting customer satisfaction?

Our nVeris® Assessment and Value Stream Management platform will capture and score hundreds of data points across assessment stages, quantifying improvement opportunities in clear financial terms.

Our expert Advisory team then collaborates with your stakeholders to review outcome scenarios and prioritize a targeted roadmap to accelerate your path to improvement and drive sustainable value.

- **Identify Top Blockers:** See what's hindering value, quality, and predictability.
- **Quantify Improvements:** Understand what needs to change and why, in financial terms.
- **Build Alignment:** Create consensus to fund improvement efforts.
- **Set a Baseline:** Measure progress and ROI over time.
- **Drive Continuous Improvement:** Sustain and improve performance with nVeris®

Model-Driven Assessment Approach

Enterprise Agile Transformation

Implement Enterprise Agility with higher adoption and ROI

We quickly earn the trust of our clients by listening and because we have real world experience, speak your language, and have lived through many of the same challenges in some of the world's largest and most complex regulated industries.

With our Model Driven Assessment and decades of expertise, we target crucial aspects and of your transformation, enhancing or rebooting your agile practices for measurable performance improvements.

Empower your organization with our proven approach

We tailor our services to meet your organization's needs. Many of our Enterprise Transformations include the following activities:

- Opportunity Identification
- Implementation Strategy
- Stakeholder Consensus
- Training and Advisory
- Strategic Communication
- Visualization of Funding and Strategic Governance matched to execution and service performance
- Capex and R&D tax credits

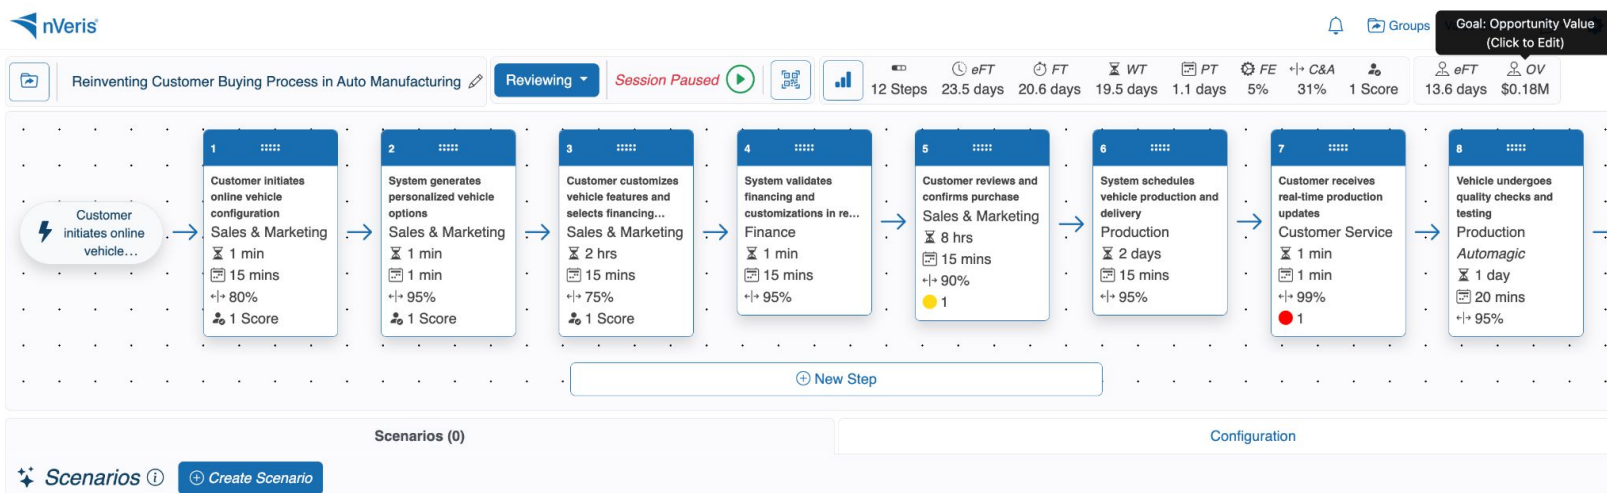

Value Stream Management

Our highly engaging Value Stream workshops using the nVeris® AI Accelerated - Value Stream Collaboration platform, accelerates the connection of ideas from diverse functions to gain insights and proactive improvement of value flow.

Management of a system requires knowledge of the interrelationships between all of the components within the system and of everybody that works in it.

—W. Edwards Deming

Accelerate Value

Value Stream Management Made Easy

We advocate for the transformative potential of value stream management for organizations of every size and industry. Radically reducing the cost and time to continuously improving outcomes.

■ Diverse functions can easily connect and collaborate on ideas to improve value.

We empower our clients to rapidly deploy and manage Atlassian products using DevOps, LeanOps iTSM®, and our nVeris® Enterprise Agility Acceleration toolkit—enabling you to operate at the speed of business agility.

Clients leverage our advisory services, hands-on technical expertise, and AI-powered nVeris® suite for collaborative assessments and performance management.

Our team specializes in implementing Atlassian products like Jira, Confluence, Bitbucket, Atlassian Access, Jira Service Management, and other platforms. We optimize your tools so you can focus on delivering exceptional solutions to your customers.

Holistic Approach

- Atlassian - Gold Solution Partner
- nVeris model-driven performance tools
- TecVeris LeanOps iTSM® to integrate your Agile framework with Business and Operations
- Certified Expert Atlassian Migration Services
- Build services: Expert Workflow and CI/CD Tooling
- Run services: Atlassian Managed Services in a flexible fractional SLA Model
- Collaborative Compliance Flow Model - transition from tollgate review and approval committees to stream aligned flow in regulated high assurance environments.

In today's landscape of increasing complexity, security threats, and market disruptions, investing in DevOps enablement is crucial. We help clients build and scale DevOps in a cost-effective, incremental way.

Embracing a DevOps culture aligns business priorities with technical advancements, bridging the gap between delivering business value and enhancing technical capabilities.

Any organization that designs a system will produce a design whose structure is a copy of the organization's communication structure.
—Conway's Law (Dr. Melvin Conway, Harvard Business Review, 1967)

DevOps Culture

- Value Stream Collaboration Workshops
- Enterprise Agile transformation with integrated DevOps and ITSM
- Relative risk-based workshops to plan incremental DevOps investments
- Workflow automation across Jira, Azure DevOps, Jenkins, virtualization, and other CI/CD tools
- Value Stream visualization and simulation
- Common component catalog across Build and Run
- Capacity allocation and demand management across Build and Run
- Continuous improvement

By 2023, 80% of ITSM teams that have not adopted an agile approach will find their ITSM practices are ignored or bypassed as a result of more agile ways of working being adopted elsewhere in the organization.

—Gartner Research

TecVeris, with its nVeris® Enterprise Agility Acceleration Toolkit

Align product R&D, engineering, service, and operations value streams across SAFe® Portfolios. This approach bridges the gap between "Grow the Business" and "Run the Business" activities, enabling seamless integration and collaboration among various teams and stakeholders.

The nVeris toolkit enhances organizational agility by ensuring that development and operations are not just synchronized but continuously improve together, promoting faster, smarter solutions that adapt to changing business needs

Holistic Approach

TecVeris' LeanOps iTSM® integrates ITSM with lean-agile practices to enable scalable growth. By "shifting left," we incorporate Support and Operations into the Agile lifecycle using SAFe.

From OKRs and User Stories in product development to Service Cases and Level-Zero knowledge reuse for self-resolution, we ensure alignment and ROI.

Connecting ARTs and Services across the solution lifecycle supports data-driven execution and hypothesis-driven development, boosting innovation, quality, and business agility.

nVeris® Enterprise Agility Acceleration Toolkit

Accelerated SAFe Adoption and ongoing Improvement of ROI

Track execution by OKR, Epic, Capabilities, Features across business/development ARTs
Lean governance, agile budgets and transparency across the organization
