Gala Lab Officially Launches the Traditional Chinese version of MMORPG 'Rappelz' 《The 9th Seal: Endless Summoning》in Taiwan, Hong Kong and Macau

2026년 6월 16일

Gala Lab (CEO Kim Hyunsu) announced that the MMORPG 'Rappelz' that is developed and operated by the company, will be officially launched as 《The 9th Seal: Endless Summoning(第九封印：無盡召喚)》as the localized version in Taiwan, Hong Kong, and Macau on June 22.

《The 9th Seal: Endless Summoning》 is a Traditional Chinese version based on Gala Lab's flagship MMORPG 'Rappelz,' allowing players to fully enjoy the original game's vast fantasy world, creature (summoned pet) growth system, and strategic combat content. In particular, it offers a deep MMORPG experience through its unique system for collecting and raising various creatures, large-scale party play, and user-to-user cooperative and competitive content.

Rappelz has previously been widely loved by players in the Greater China region, and this time, it will reunite with players in Taiwan, Hong Kong, and Macau under the new name 《The 9th Seal: Endless Summoning》 with localized content. Furthermore, the global service has continuously expanded content and improved systems,

including the addition of new dungeons, quests, and equipment progression systems. All of this accumulated new content and improvements will be incorporated into 《The 9th Seal: Endless Summoning》. In particular, the game has been designed to allow not only existing players but also new players to enjoy the game more easily through the implementation of new seasonal content and various quality-of-life improvements.

The service in Taiwan, Hong Kong, and Macau will be provided through the local gaming platform “94hi,” offering a Traditional Chinese version optimized for the local user environment. Users can download and play the game via the 94hi platform, as well as access various community features and event content.

To celebrate the official launch, various in-game events and special rewards have been prepared. Growth support items for new users, login rewards, and various commemorative events are scheduled to take place, with details to be revealed sequentially via the official website and community channels.

With the launch of 《The 9th Seal: Endless Summoning》, Gala Lab plans to reintroduce the original charm and fun of Rappelz to users in Taiwan, Hong Kong, and Macau, while also providing various operational events and continuous content updates that reflect the play styles of local users.

A Gala Lab representative stated, “We are delighted to reintroduce Rappelz, a game that has long been loved by global users, to players in Taiwan, Hong Kong, and Macau in its new form as 《The 9th Seal: Endless Summoning》,” adding, “We will strive to provide the best MMORPG experience to local users through stable service and continuous content updates.”

About 94hi

“94hi” is a locally specialized gaming platform targeting users in the Greater China region, including Taiwan, Hong Kong, and Macau, offering game services across various genres with a focus on PC online games. It supports an integrated environment ranging from account registration to game launch, customer support, event management, and payment systems, providing stable and convenient gaming services to local users.

In particular, it offers high accessibility and convenience by supporting a local authentication system tailored to the usage environment of Taiwanese users, as well as region-specific payment methods such as MyCard and Chunghwa Telecom. Additionally, it strengthens communication with users and supports a smooth gaming environment through various platform features, including a game launcher, announcements, a community, and event pages.

Currently, 94hi operates various online game services, including Flyff, RF Online, and The 9th Seal: Summoning of the Endless, and has established

itself as one of the leading game publishing platforms in the Taiwan, Hong Kong, and Macau regions.
