The pop-up fabric walls easy to use hardware only requires you to pop-up the system and snap together the multiple clips that give this structure its rigidity. The walls graphic is completely interchangeable because of a velcro edged perimeter. Transport the fabric wall with ease and convenience. Once closed, it fits into a compact travel bag that allows you to easily move the product.

USES: TRADE SHOWS, PARTIES, BACKDROPS, WEDDINGS, PRESS CONFERENCES

The rectangular flag is one of only two products in this category where we offer a seventeen-foot option. This larger option utilizes our grommet system for added support as well as a multi-section water base which allows this product to hold up in some of the strongest winds. The seventeen-foot version of our rectangular flag requires two people to setup.

Step One

Do not setup artwork this way. Artboard should be the desired finished size.

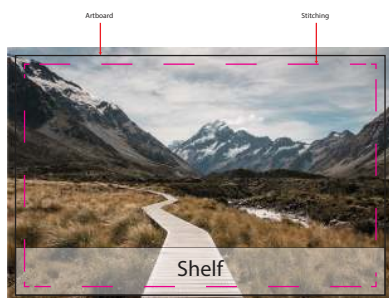

Step Two

Shirt tail/info bar information should be sent to us by email.

Set up artwork to finished size + 0.5" bleed

Please make sure artwork is accurately lined up to the edge of the artboard if bleed can not be created. Our software will mirror the image to create bleed. If there is a gap between the artwork and edge of the artboard, the bleed will not be mirrored properly!

Step Three

Any of the overlay information should be turned off in the print file. Please provide a separate reference pdf for overlay information.

100%@100dpi

50%@200dpi

25%@400dpi

Step Four

Our software has a minimum of 100dpi. Anything below will be flagged. In order to ensure your print is not pixelated, please ensure your files are 100dpi. In cases where it is a very large print, 75dpi is the acceptable minimum.

Step Five

Map colours appropriately if it requires a spot colour.

Special spot colours like Cadbury_purple needs to be named the same in any future projects. We will save the matched colour to our library, for automatic and consistent colour matching.
