

About Us

Transforming Organizations with Talent and Technology

TECKpert connects public sector organizations with the tech talent, services, and technologies needed to address modern challenges and drive secure operational efficiency. Our expertise spans IT staff augmentation, software modernization, and digital transformation, providing agencies with the tools to enhance their capabilities, secure critical infrastructure, and achieve mission-critical objectives. By integrating innovative technologies around AI, we help government agencies modernize workflows, improve efficiency, and secure their infrastructure and applications while navigating the complexities of today's digital landscape.

We take a client-centric approach to prioritize our clients' needs, goals, and requirements to deliver tailored solutions.	We have established strong partnerships with leading technology providers, giving us access to the latest tools and platforms.

Services

Where Modernization and Innovation Meet to Drive Mission Success

IT Staff Augmentation	At TECKpert, we recognize that securing the right talent is essential for government agencies to achieve their mission-critical objectives. Through our IT Staff Augmentation services, we streamline the process of recruiting, vetting, and managing skilled IT professionals for short and long-term projects.
Website Design and Development	TECKpert delivers modern, secure, and accessible websites for federal, state, and local government agencies, as well as enterprise organizations. We specialize in building and modernizing public-facing digital platforms on FedRAMP-authorized content management systems.
Software Development & DevSecOps	We offer a dynamic solution tailored to the unique needs of government agencies at state and local levels. Our in-house teams specialize in executing software development projects with precision and efficiency, leveraging our internal staffing capabilities to assemble the ideal teams for each project.
AI Enabled Software Modernization	ModSafe™ is TECKpert's AI enabled Software Modernization solution. Our remediation team utilizes AI to scan your code repository for deficiencies and vulnerabilities from CVEs. Code is written and pushed to the repository automatically reducing remediation time by 90%.

Core Capabilities: *Digital Transformation, Website Development, Software Development, Artificial Intelligence, AI Software Modernization, DevSecOps, Cybersecurity.*

Key Achievements
