

Custom user roles – full access control

With our new **Custom user roles** feature, you decide which users have access to specific functionalities. In addition to standard roles like **Admin, User, or Read-Only**, you can now create fully customized roles that match your specific needs.

Grant your team exactly the permissions they need

Why choose for custom user roles?

Fully customizable – Create unlimited new roles tailored to your needs.

Instant setup – No intermediaries or waiting times, you have full control.

Flexible for multiple organizations – Manage user permissions per organization. A user can have different rights per organization.

Always adjustable – Modify permissions anytime as your needs change.

€

What does it cost?

> Enjoy extra flexibility for just €250/month

For €250/month you can create as many custom roles and users as you like

With Custom user roles, you have the ability to manage access exactly as your organization requires. No restrictions, no compromises – just maximum control.

Interested? Activate Custom user roles today and manage your team exactly the way you want!
