EDUCATION

University of Maryland-College Park
B.S. Computer Science

Universitat Pompeu Fabra
M.S. Information & Communication Technology

Microsoft Certified: Azure Fundamentals
Issued: 2025

PROFILE

Systems thinker with a hybrid design and engineering background, focused on partnering with cross-functional teams to craft scalable, intuitive experiences that bridge strategy and execution across AI-integrated web and platform solutions.

WORK EXPERIENCE

Senior Product Designer | Microsoft

Catalog AI | Solution Accelerators | Secure by Design v-team   Nov 2024- present

- Led the design vision and execution for Catalog AI, an intelligent assistant transforming how sellers navigate and leverage Microsoft's solution catalog.

- Directed the design of Solution Accelerators—reusable, pitch-ready solutions for sellers, guiding a team of designers to craft scalable experiences that supported rapid customer engagement.

- Partnered with designers and engineers to build the v1 Secure by Design website using Lovable, React, TypeScript, and Fluent UI, creating a central hub for reusable UX patterns, security checklists, and design guidance.

Lead Product Designer | Microsoft

Sales Catalog redesign website | Catalog Copilot plugin   2021 - 2024

- Led UX for Microsoft's Sales Catalog redesign and Catalog Copilot, delivering assistive, role-based experiences that helped sellers discover and match solutions faster.

- Redesigned information architecture, filtering, and layout to improve usability and alignment with Microsoft Design principles.

- Built modular, scalable UI systems in Figma and collaborated cross-functionally to streamline workflows and accelerate delivery.

UX Engineer II | Microsoft

OneDrive, SharePoint | Microsoft Lists | Fluent Design   2019 - 2021

- Designed, developed, and managed the UI/UX, web design, and front-end components for Fluent UI Design system, Microsoft's component library featuring 30+ components for web and mobile applications.

- Led A/B testing and crafted React/JS front-end systems to strengthen design–dev workflows.

Co-founder | Terrachain

Founding Designer   2018 - 2021

- Led the end-to-end product lifecycle, from customer discovery and user research to development and delivery. Designed the brand identity and built rapid prototypes aligned with the company's mission, driving customer acquisition and supporting investor demos.

Design Developer | Booz Allen Hamilton

Recreation.gov | NIH | NICHD   2015 - 2018

- Built responsive web apps for federal agencies, converting Flash games to HTML5, prototyping Recreation.gov's mobile experience, and improving NICHD DASH with accessible, 508-compliant UIs.
