Universal Gauge Device

Precision-engineering
for faster, easier repairs
and commodity change

The team at McKenzie Valve is excited to announce the launch of our Universal Gauge Device for General Purpose and Pressure Tanks Cars. A superior alternative to traditional gauge rods, eliminating hassle.

Universal Gauge Device Technical Specs

- Universal rod for all McKenzie gauges
- Outage Conversion Decal gives outage values for up to 3 commodities
- Mounting uses standard 3 1/4" diameter bolt circle with tongue and groove connection
- Guide tube welds to bottom of fittings flange in standard 3/4" flange socket
- Max outage is approximately 55" with slight variation per configuration
- Can be installed on fittings flanges ranging from 1.375" to 2.625" thick
- User interface familiar to loaders as it is similar to existing gauges
- Stainless Steel construction

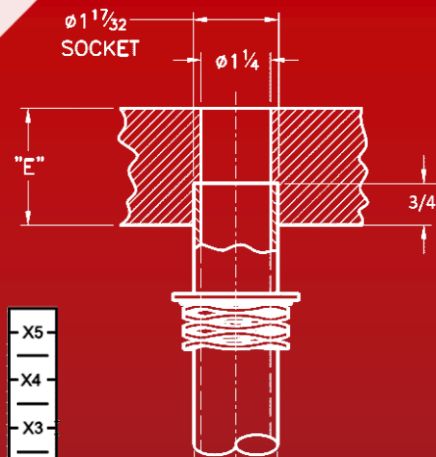

Benefits

- Keep rods in-stock for short lead times and quick repairs
- Easier commodity change process
- Replaces serial confusion with uniform part number simplicity

The McKenzie Valve Difference

We believe that customers should have choice when it comes to their tank car valves and parts. That is why the team at McKenzie Valve is working to show you that we go the extra mile for our customers.

- Unmatched product availability and responsive service
- Complete range of well-designed, reliable products
- Continuous innovation and process improvement
