

The average practice is missing \$30,000/month in revenue.

Here are the 4 metrics you need to understand your practice's financial health:

COLLECTION PERCENTAGE:

The percentage of your production that actually turns into collected revenue; are you actually collecting what you earn?

ADJUSTMENTS:

The percentage of your gross production written off, whether through PPO write-offs, discounts, or other adjustments

OVER 90-DAY TOTAL AR PERCENTAGE:

The percentage of all unpaid balances (insurance + patient) that are over 90 days old; how much money is aging out?

OVER 90-DAY INSURANCE AR PERCENTAGE:

The portion of your insurance claims that are more than 90 days old.

Healthy practices don't guess, they track.
