

Summary

Product Designer with 6 years of experience across B2B SaaS, industrial control systems, and mobile products. I work in complex, constraint-heavy domains where design decisions have real consequences: safety-critical interfaces, enterprise tooling, and products used under pressure. Comfortable taking a project from research to shipped screens and documenting the thinking along the way.

Experience

BaxEnergy | Product Designer

Dec 2024 – September 2026

- designed interfaces for Ryskore and Convera PPC enterprise products in cybersecurity monitoring and power plant control
- applied safety-critical design principles including WCAG 2.1 AA accessibility standards and high-contrast visual hierarchies for operational environments
- worked within an agile team translating complex domain requirements into usable, reliable interfaces for specialist users
- maintained design consistency through style guides and design systems
- presented and communicated design decisions

Airnavts.com | UX / UI Designer

August 2020 – Nov 2024

- designed mobile apps and websites across multiple industries in an agency environment, taking projects from initial brief to high-fidelity prototype
- ensured user-friendly and accessible designs
- collaborated with cross-functional teams
- maintained component libraries and style guides
- presented and defended design decisions

Magora Systems | Junior UI Designer

July 2019 – Oct 2019

- delivered visually appealing user interfaces for mobile apps
- conducted visual research
