Recall #: R0263-1 | High Pressure Fuel Pump Recall Date: 2024 Sep 11

Recall Description

Issue: On certain vehicles, the high-pressure fuel pump could fail. If this happens, the engine may run rough and the check engine light may turn on. This could also cause a sudden loss of engine power while driving. Safety Risk: A sudden loss of engine power could increase the risk of a crash. Corrective Actions: Hyundai Canada will notify owners by mail and advise you to take your vehicle to a dealership to update the engine control module software. The high-pressure fuel pump will be replaced, if necessary. Precautions: In the interim, if you experience a reduction of drive power, or the malfunction indicator light (“MIL”) turns on, you should seek service at your Hyundai dealer as soon as possible.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact HYUNDAI or visit [Hyundai's website](https://recall.hyundaicanada.com/).
