

Partnering for Impact:
Transforming African Education
Together

About Injini

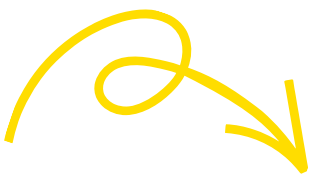

Non-profit company and **Public Benefit Organisation** based in Cape Town, with pan-African reach. Injini is **Section 18A approved**.

Our **mission** is to increase the quality, accessibility, and relevance of education in the region.

We are founded on the belief that innovation and technology - developed **by Africa, for Africa** - can help solve the continent's most pressing education challenges.

The state of education in Africa

An overview of essential data highlighting the current state of education across the continent.

9 out of 10 African children are unable to read or solve basic maths problems by age 10.

(UNICEF, 2022)

Literacy Crisis

Over half of the 251 million out-of-school children and adolescents globally are in sub-Saharan Africa.

(UNESCO, 2024)

School Dropout Rates

The education-employment gap is widening every year.

Children in sub-Saharan Africa will only achieve 40% of their potential productivity due to education deficiencies.

(World Bank HCI, 2020)

Skills Gap

Challenges faced by EdTech startups

An overview of key obstacles hindering the growth and impact of African EdTech companies.

In 2023, Africa's venture capital equity funding dropped by 54% to \$2.3 billion, **with EdTech being particularly affected**, receiving only 1% of the total investments.

(Injini Insights Report, 2024)

Funding

Many African countries lack cohesive regulatory frameworks. Only a few, like Ethiopia and Rwanda, have formal EdTech policies in place, while others, such as Ghana, are still in early development stages.

(CNBC Africa, 2024)

Policy Barriers

In sub-Saharan Africa, **89% of learners lack access to a computer at home**, and 82% are without an internet connection at home. These significant gaps in digital access present substantial challenges for EdTech adoption across the continent.

(The UNESCO Courier, 2023)

Adoption

Our Unique Approach

A summarised representation of Injini's approach to creating impact in the African education sector.

Our Unique Approach

African EdTech Startup Acceleration

We support high-impact EdTech business founders and leaders to improve learning outcomes throughout sub-Saharan Africa - with a key focus on increasing their impact and sustainability.

African Education Innovation Ecosystem Development

We do our part to increase the quantity of viable, evidence-driven innovations, adoption rates by prospective EdTech implementers, investment by EdTech enablers and collaboration between all stakeholders.

Research & Advisory

The Injini Think Tank conducts industry research and provides market insights for EdTech entrepreneurs and other ecosystem members. We aim to influence decision-making to create a supportive environment for EdTech in Africa.

Injini's Impact

6.9 million+

Learners and teachers estimated to have been reached by incubated and accelerated companies¹

\$14.7M in funding

secured by supported EdTech companies since entry into the program

65% of new jobs

went to women—driving youth & gender equity in employment

38.76%

median year-on-year revenue growth rate from 2017 - 2025

Stronger impact measurement

EdTechs are better equipped to track & prove educational outcomes

¹Impact from 2018-2022 pan-African cohorts was estimated to grow 15% YoY where ongoing post-program data was not reported. Total includes 3.7 million learners and teachers verified to have been reached by cohorts in 2023-2025.

Testimonials from our Ecosystem

"The EdTech Fellowship programme has been nothing short of amazing. There is no programme with a bespoke and tailored approach like this programme. The support is relevant and real in a way that really aids your entity to grow. The programme is also not exhaustive in its requirements in a way that derails you from focusing on running your business which is also great."

Nhlanhla Mposula, 2024 EdTech Fellow

"Africa Tikkun Bambanani has achieved significant success in securing funding this year, and the programme has played a key role in this outcome. Several elements contributed to this, including the feedback on the pitch deck, input from all other Fellows, the Theory of Change framework and discussions in different programme workshops with stakeholders about their preferences and priorities. By leveraging 1% from every aspect that the programme offered across the two years, it culminated in a substantial collective impact."

Theresa Michael, 2023 EdTech Fellow

Our Footprint

80

African EdTech Startups

supported through intensive incubation and acceleration programmes

19

African Countries

represented in Injini's portfolio of incubation & acceleration programme participants

4,000+

African EdTech Innovators & Enthusiasts

reached and engaged with via Injini's EdTech ecosys development initiatives, including 700+ trained

Recent Injini Programmes

Mastercard Foundation EdTech Fellowship

The Mastercard Foundation EdTech Fellowship is a six-month, equity-free acceleration program designed for high-growth and high-impact companies that use technology and innovation to address challenges in South African education. The 2026 cohort has an inclusion and accessibility theme, designed to improve access for the most marginalised learners.

Injini Acceleration Partnership Programme

Injini has partnered with the UBS Optimus Foundation and other partners to deliver a pan-African EdTech-specialised venture development programme.

Project Management for Education NGOs

Injini partnered with NASCEE to deliver an online course to support 45 South African grassroots education NGO representatives to develop and refine their project management skills within the context of the local education sector.

Evidence for EdTech Entrepreneurs Course

Injini partnered with EdTech Hub to support 44 pan-African entrepreneurs across two cohorts, providing peer mentorship and workshops on user experiments, product roadmaps, fundraising and investment readiness.

Our Events and Ecosystem Engagement

South African EdTech Week offers a unique opportunity to explore investment prospects in innovative educational technologies, connect with emerging EdTech ventures, and collaborate with other stakeholders committed to transforming education across the continent.

South African EdTech Week

Our ecosystem events unite our alumni to exchange insights, ideas, and expertise. These gatherings provide a platform for EdTech companies to connect on a deeper level, fostering meaningful relationships and partnerships that drive impact and support scalable growth.

Ecosystem Events

Injini hosts startup showcases, roundtables, and panel discussions to spotlight the potential of EdTech. By creating a platform for engagement and exposure, Injini helps EdTech startups gain visibility, attract investment, and scale impactful solutions.

Our Partners in Impact

Our work has only been possible with close collaboration and support by aligned partners.

UBS Optimus
Foundation

Why Partner with Us?

Investing in Injini's work enables sustainable, scalable impact in education across Africa. By supporting high-potential EdTech ventures, driving research, and fostering collaboration, funders play a vital role in shaping the future of learning. This partnership offers several key benefits:

High visibility & thought leadership

Direct engagement with top African EdTech startups

Contribution to systemic change in education

Ways to Get Involved

Programme Funding

Support a cohort, research, or policy initiative

Event Sponsorship

Fund an event and gain visibility & engagement

Strategic Partnerships

Collaborate on ecosystem development, advocacy, or knowledge sharing

Non-financial Support

Support a cohort, research, or policy initiative

Let's Collaborate
