Employees	approximately 90 (2025)
Assets under management	around €8 billion (2026)
Investors	institutional investors, primarily insurance companies and pension funds
Geography	Europe - investments across 12 European countries
Technologies	energy generation infra: Onshore wind, offshore wind, solar PV energy integration infra: BESS, green hydrogen, grid assets, and substation
Website	www.luxcara.com
Fund structures	closed-ended funds domiciled under Luxembourg law
Active funds	5: Flaveo I, Flaveo II, Flaveo III, Flaveo IV, Flaveo V

About Luxcara

Luxcara is an independent asset manager founded in Hamburg, Germany, in 2009 and focused exclusively on energy transition infrastructure across Europe. The firm offers institutional investors access to both debt and equity investment opportunities in European energy infrastructure. With over 17 years in the sector, the firm has built a long-standing track record across clean energy generation and energy integration technologies.

Since inception, Luxcara has deployed over €8 billion across more than 100 assets in 12 European countries. The portfolio spans battery storage, green hydrogen, EV charging infrastructure, grid assets, substations, as well as offshore and onshore wind and solar PV.

With close to 90 in-house specialists across investment, financing, technical, long-term off-take structuring, and asset operations, Luxcara covers the full investment and asset management value chain.This setup enables Luxcara to originate, structure, and actively manage assets from construction through long-term operation. Aiming to capture market opportunities with speed and deliver consistent execution, the firm maintains direct control over key value drivers, including contract structures, financing terms, and operational performance.

As one of Europe's most established asset managers for energy transition infrastructure investments, Luxcara is committed to turning the ambitions of the energy transition into resilient infrastructure with long-term value and lasting impact.

Selected Projects

- Waterkant Offshore Wind, German North Sea: Luxcara-owned project near the island of Borkum, with an approximate capacity of 300 MW.
- Hamburg Green Hydrogen Hub, Hamburg: joint project with state-owned utility Hamburger Energiewerke at the former Moorburg coal power plant site, where a 100 MW electrolyzer is planned; Luxcara owns 74.9%. IPCEI funding received in 2024.
- Waltrop Battery Park, North Rhine-Westphalia: Luxcara is developing a 520 MW stake alongside BKW AG and Trianel; the park's first expansion phase targets 900 MW / 1,800 MWh on a brownfield site.

Luxcara

- Önusberget Wind Farm, Sweden: acquired in 2019, part of the Markbygden cluster in northern Sweden, with more than 750 MW of installed capacity.
