TRIFORCE TECHNOLOGY

PRECISIONSUPPORT | OPTIMIZEDFIT | DYNAMICCOMFORT

Zamst TRIFORCE TECHNOLOGY is more than innovation — it's a fully integrated approach that combines three elite-level performance principles: Precision Support, Optimized Fit, and Dynamic Comfort. Together, these three elements form the TRIFORCE TECHNOLOGY—a powerful competitive advantage that enables athletes to achieve peak performance.

ZAMST TECHNOLOGY

Advanced engineering empowers next-level performance.

PRECISION SUPPORT

Precision Support is our science-driven approach to joint stabilization. Leveraging decades of medical expertise and sport-specific engineering, Zamst braces are built to deliver targeted reinforcement that neutralizes instability without limiting mobility. Whether you're bracing a knee, ankle, or wrist, the support is calculated, responsive, and ready for peak performance.

Optimized Fit

Optimized Fit is the intersection of human biomechanics and intelligent design. Our anatomical shaping, adjustable strap systems, and form-fitting materials create a locked-in feel that responds to your movement in real time. This is more than a good fit — it's a performance-aligned interface between body and gear.

Dynamic Comfort

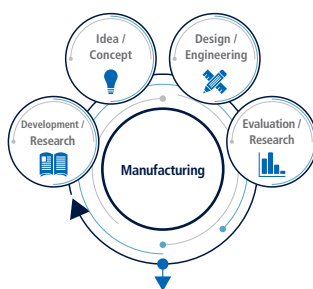

Completing the system is Dynamic Comfort: lightweight, breathable, sweat-resistant materials that work as hard as you do. Whether you're training for hours or performing at game speed, Zamst keeps you cool, dry, and irritation-free — so your focus never slips.

FROM MEDICAL FIELD

Zamst is a brand of braces, supports, and care products for athletes, created in 1993 by Nippon Sigmax Co., Ltd., a Japanese medical device manufacturer who has been developing and manufacturing products for the orthopedics field for half a century. Our mission is always to offer products and services that will help prevent injuries and improve athletic performance by incorporating the knowledge and advice of sports medicine physicians, athletic trainers, and other professionals and listening to athletes' voices. Quality and functionality are the reasons why many top athletes, both professional and amateur, use our products.

Concept of Manufacturing

We always keep following this work cycle.

Product Development

We always strive to catch up the latest study results from all over the world and utilize the knowledge for our product ideas. Comments and opinions from sports physicians and athletic trainers give us useful hints to our product development.

Design

We have skills and technology to precisely measure the human bodies and utilize the product designs. We conduct product design thoroughly dedicated to the skills and technology in order to realize proper fit to three-dimensional body.

Material Selection and Evaluation

We carry out thorough material testing to seek material characteristics that can fulfill required function. In addition, we have various kinds of in-house quality evaluation equipment.

Product Evaluation

We verify the functions to see how our products affect the movement of human body with various kinds of functional test equipment. We are exploring the products that can truly provide maximum effect.

Field Evaluation

We carry out field evaluation on usability, fitting and durability with sports players.

Corporate Efforts

Aiming to become a world-class company and deliver excellent products

We expand our know-hows cultivated in Japan to overseas countries. We always strive to support athletes' training, competition, and challenges as much as possible by delivering products with world-class quality and functionality.

Global networks help us gather information and proactively offer superior products faster than others while playing important roles in marketing, product development, and manufacturing sites.

Sigmax (Huzhou) Medical Co., Ltd.

CHINA

Located in Huzhou, Zhejiang province, Sigmax (Huzhou) manufactures Sigmax products. In addition, the Shanghai branch promotes business activities in China.

ZAMST PARTNERS

Zamst supports athletes and teams who always keep challenging the limit.

ATHLETE

Trae Young (Basketball)

"The ankle braces with Zamst made my game - and just the day that I joined the court - a lot easier, a lot stress-free of injury. That's something detrimental to me. I think it's important for athletes to take care of their bodies, especially basketball players and ankles, and Zamst ankle braces made it possible for me to play that way and play like that, so I think that they can help the next person."

Trae Young wears A2-DX

Wilfredo Leon (Volleyball)

"I believe the injury prevention is the key for the best performance. I noticed it since I had some minor injuries throughout my careers. I'm trying many different Zamst products and I feel perfect with all of them!"

Wilfredo Leon wears ZK-MOTION and ZK-PROTECT

Magdalena Stysiak (Volleyball)

"Thanks to Zamst stabilizers, I have a guarantee that my injuries would not worsen. I feel comfortable, and above all, safe in it. "

Magdalena Stysiak wears A2-DX

Yuji Nishida (Volleyball)

"I found the Zamst Arm Sleeve to be comfortable, and I noticed that a little compression on my muscles helped me to perform better. Now, wearing arm sleeves for a game is something I do without even thinking about it."

Yuji Nishida wears Arm Sleeves

Reduce ankle movements stressing the Achilles tendon

LIGHT

3L	105 - 115

How to select ZW-7

Measure the circumference of your waist at the navel. If your measurement falls between two sizes, choose the larger one.

Elbow

Support entire elbow with compression

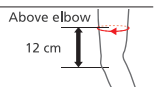

MODERATE

Elbow Sleeve

Size	cm
M	22 - 25
L	25 - 28
LL	28 - 31
3L	31 - 34

How to select Elbow Sleeve

Measure the circumference of the arm 12 cm above the elbow. If your measurement falls between two sizes, choose the larger one.

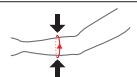

Reduce the strain on the elbow with pad compression

Elbow Band

Size	cm
M	20 - 26
L	26 - 31

How to select Elbow Band

Measure the circumference of the forearm at the widest part. If your measurement falls between two sizes, choose the larger one.

Shoulder

Stabilize shoulder with high fixing force without hindering movement

MODERATE

Shoulder Wrap

Size	cm
M	34 - 41
L	41 - 48
LL	48 - 55

How to select Shoulder Wrap

Measure the circumference of the arm at the shoulder joint. If your measurement falls between two sizes, choose the larger one.

Wrist

Full adjustment of compression just by wrapping around the wrist

MODERATE

Wrist Wrap

Size	cm
M	13 - 17 (Product width 6.5 cm)
L	15 - 21 (Product width 7.5 cm)

Stabilize the wrist firmly for stable movement

MODERATE

Wrist Band

Size	cm
M	13 - 17
L	17 - 21

Support wrist from intense movement of racket sports

MODERATE

FILMISTA
フィルムスタ リスト WRIST

Size	cm
M	13 - 17
L	17 - 21

How to Select Wrist Wrap, Wrist Band and FILMISTA WRIST

Measure the circumference of the wrist at the narrowest part. If your measurement falls between two sizes, choose the one you like best based on its width.

Finger

ZAMST

Easy compression on the entire thumb

LIGHT

Thumb Guard Soft

Size	cm
M	5.2 - 6.4 (Thumb circumference) 13.0 - 17.0 (Wrist circumference)
L	6.3 - 7.5 (Thumb circumference) 16.0 - 20.0 (Wrist circumference)

How to select Thumb Guard Soft

Measure the circumference of the first thumb joint and the circumference of the wrist. If your two measurements do not match the proposed combination, choose your size based on your wrist measurement.

Assure stability and fitness to the entire thumb

MODERATE

Thumb Guard

Size	cm
M	8.0 - 9.5 (Thumb circumference) 13.0 - 17.0 (Wrist circumference)
L	9.5 - 13.0 (Thumb circumference) 16.0 - 20.0 (Wrist circumference)

How to select Thumb Guard

Measure the distance from the first thumb joint to the base of the wrist and the circumference of the wrist. If your two measurements do not match the proposed combination, choose your size based on your wrist measurement.

<SINGLE>

<DOUBLE>

Support for sprained finger

Finger Wrap <SINGLE> <DOUBLE>

Size	cm
S	4.1 - 5.3
M	5.3 - 6.5
L	6.5 - 7.7

How to select Finger Wrap <SINGLE> and <DOUBLE>

Measure the circumference of the finger that you want to support. When you wish to support your little finger, measure your ring finger (for <Double> only). Select the size after measuring the circumference of the second joint of your finger. If the measurement falls between two sizes, select the larger one.

Thigh, Calf

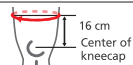

Support unstable thigh with thin and strong structure

FILMISTA
フィルムスタ THIGH

Size	cm
S	43 - 48
M	48 - 53
L	53 - 58

How to select FILMISTA THIGH

Measure the circumference of the thigh 16 cm above the center of the kneecap. If your measurement falls between two sizes, choose the larger one.

Assured mobility with compression on calf

FILMISTA
フィルムスタ CALF

Size	cm
S	31 - 35
M	35 - 39
L	39 - 43

How to select FILMISTA CALF

Measure the circumference of the calf at the widest part. If your measurement falls between two sizes, choose the larger one.

Icing

Icing and compression on various regions

IW-1

* The Ice Bag is sold separately.

One medium-sized Zamst Ice Bag included.

IW-1 set

Icing and compression on the shoulder and lower back

IW-2

* The Ice Bag is sold separately.

Two large-sized Zamst Ice Bags included.

IW-2 set

For first aid, cool down and heatstroke measure

FEATURES

① Optimal support for a personalized comfort and fit

From three arch types, you can choose the one best fit for your own feet. Effective and personalized support and excellent fit are realized.

② Ideal alignment by Windlass Mechanism

A Design is based on the "phenomenon of Windlass" mechanism that creates a natural movement of the foot. It supports alignment of the arch, and leads a tilt of the foot to a more neutral position to reduce stress. It prevents foot troubles.

* The "phenomenon of Windlass" refers to a state where the plantar fascia is wound up as the toe rises and arch rigidity of the foot increases.

③ Realize high stability and flexible support

A gradual support offered by "Core Stabilizer" and "Flexible Holder" realizes both high stability on the unstable heel and flexible support that follows the arch movement.

Footcraft STANDARD CUSHION+

Absorb shock at landing

[SHOCK ABSORPTION]

The excellent shock absorption reduces the impact on the forefoot and heel on landing.

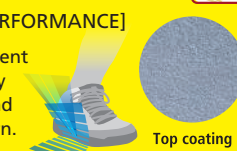

Footcraft AGILITY GRIP

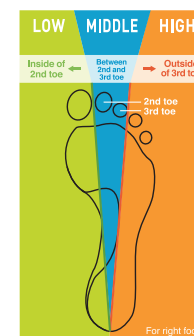

Ideal grip onto the ground

[ADDITIONAL GRIP PERFORMANCE]

Top coating with excellent grip performance firmly captures the ground and leads to a smoother turn.

HOW TO SELECT YOUR BEST FIT FOOTCRAFT

Footcraft is the functional insole that has been developed with our innovative measurement system which identifies your best fit insole from the 3 arch types. With our inventive in-store Check Board, select your best fit Footcraft.

STEP1

Stand on the board for 5-10 sec

STEP2

Step off the board

STEP3

Pull the magnet line over the arch cavity

STEP4

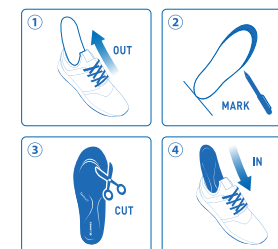

Identify your arch type from the position of the magnet line and toe

*When your measurement falls between two fingers or results different between your right and left foot, please select the lower arch type.

HOW TO APPLY

- ① Remove the original insoles from the shoes.
- ② Place the original insole on top of the Footcraft insole and mark around the toe.
- ③ Cut the extra part along the marking.
- ④ Put them in the shoes.

Supports strengthening lower limb muscles, helping to reduce knee strain

Motionaid Thigh Load

Holder Body

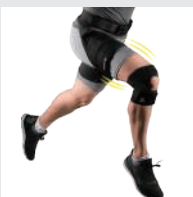

Dedicated Weights
(approx. 150g)
x 14 pieces

Size	cm
S	48 - 52
M	52 - 56
L	56 - 60

*This product includes 14 dedicated weight plates. If you need additional plates, please purchase them separately.

*Additional Weight Plates set for Motionaid Thigh Load (150 g x 2)

Wearing this device adds targeted load to the muscles around the knee, helping reduce stress on the joint. The dedicated weight plates increase muscle activity during running for more efficient training. Its proximal placement keeps your natural form unchanged, and it can be used together with a knee brace.

How to select MOTIONAID THIGH LOAD

Measure the circumference of the thigh at its widest point. If your measurement falls between two sizes, choose the larger one.

Warms your legs to help maintain performance.

Leg Warmer

*One Pair

Product Length: 38 cm
Circumference of Calf: Up to 46 cm

Cools up to 15°C below skin temperature with a simple wet-wring-snap process
