TRIFORCE TECHNOLOGY

PRECISIONSUPPORT | OPTIMIZEDFIT | DYNAMICCOMFORT

Zamst TRIFORCE TECHNOLOGY is more than innovation — it's a fully integrated approach that combines three elite-level performance principles: Precision Support, Optimized Fit, and Dynamic Comfort. Together, these three elements form the TRIFORCE TECHNOLOGY— a powerful competitive advantage that enables athletes to achieve peak performance.

ZAMST TECHNOLOGY

Advanced engineering empowers next-level performance.

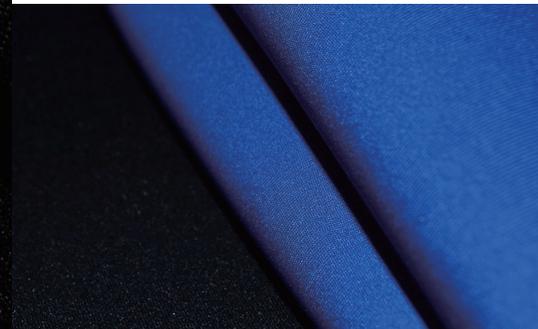

PRECISION SUPPORT

Precision Support is our science-driven approach to joint stabilization. Leveraging decades of medical expertise and sport-specific engineering, Zamst braces are built to deliver targeted reinforcement that neutralizes instability without limiting mobility. Whether you're bracing a knee, ankle, or wrist, the support is calculated, responsive, and ready for peak performance.

Optimized Fit

Optimized Fit is the intersection of human biomechanics and intelligent design. Our anatomical shaping, adjustable strap systems, and form-fitting materials create a locked-in feel that responds to your movement in real time. This is more than a good fit — it's a performance-aligned interface between body and gear.

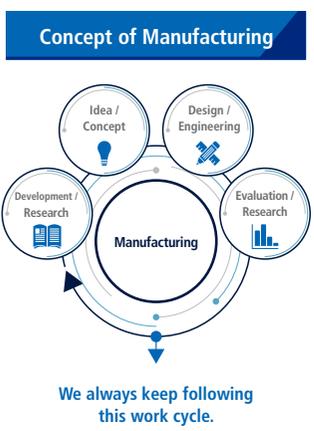

Dynamic Comfort

Completing the system is Dynamic Comfort: lightweight, breathable, sweat-resistant materials that work as hard as you do. Whether you're training for hours or performing at game speed, Zamst keeps you cool, dry, and irritation-free — so your focus never slips.

Zamst is a brand of braces, supports, and care products for athletes, created in 1993 by Nippon Sigmax Co., Ltd., a Japanese medical device manufacturer who has been developing and manufacturing products for the orthopedics field for half a century. Our mission is always to offer products and services that will help prevent injuries and improve athletic performance by incorporating the knowledge and advice of sports medicine physicians, athletic trainers, and other professionals and listening to athletes' voices. Quality and functionality are the reasons why many top athletes, both professional and amateur, use our products.

Product Development

We always strive to catch up the latest study results from all over the world and utilize the knowledge for our product ideas. Comments and opinions from sports physicians and athletic trainers give us useful hints to our product development.

Design

We have skills and technology to precisely measure the human bodies and utilize the product designs. We conduct product design thoroughly dedicated to the skills and technology in order to realize proper fit to three-dimensional body.

Material Selection and Evaluation

We carry out thorough material testing to seek material characteristics that can fulfill required function. In addition, we have various kinds of in-house quality evaluation equipment.

Product Evaluation

We verify the functions to see how our products affect the movement of human body with various kinds of functional test equipment. We are exploring the products that can truly provide maximum effect.

Field Evaluation

We carry out field evaluation on usability, fitting and durability with sports players.

Corporate Efforts

Aiming to become a world-class company and deliver excellent products

We expand our know-hows cultivated in Japan to overseas countries. We always strive to support athletes' training, competition, and challenges as much as possible by delivering products with world-class quality and functionality.

Global networks help us gather information and proactively offer superior products faster than others while playing important roles in marketing, product development, and manufacturing sites.

Sigmax (Huzhou) Medical Co., Ltd. CHINA

Located in Huzhou, Zhejiang province, Sigmax (Huzhou) manufactures Sigmax products. In addition, the Shanghai branch promotes business activities in China.

ZAMST PARTNERS

Zamst supports athletes and teams who always keep challenging the limit.

ATHLETE

Trae Young (Basketball)

"The ankle braces with Zamst made my game - and just the day that I joined the court - a lot easier, a lot stress-free of injury. That's something detrimental to me. I think it's important for athletes to take care of their bodies, especially basketball players and ankles, and Zamst ankle braces made it possible for me to play that way and play like that, so I think that they can help the next person."

Trae Young wears A2-DX

Magdalena Stysiak (Volleyball)

"Thanks to Zamst stabilizers, I have a guarantee that my injuries would not worsen. I feel comfortable, and above all, safe in it."

Magdalena Stysiak wears A2-DX

Yuji Nishida (Volleyball)

"I found the Zamst Arm Sleeve to be comfortable, and I noticed that a little compression on my muscles helped me to perform better. Now, wearing arm sleeves for a game is something I do without even thinking about it."

XL	105 - 115	41.25 - 45.25
2XL	115 - 125	45.25 - 49.25

How to select ZW series

Measure the circumference of your waist at the navel. If your measurement falls between two sizes, choose the larger one.

Elbow

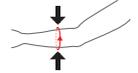

Precise and comfortable elbow brace to help relieve common pain from tendonitis

Elbow Band

Size	cm	inches
S	20 - 26	7.75 - 10.25
M	26 - 31	10.25 - 12.25
L	31 - 36	12.25 - 14.25

How to select Elbow Band

Measure the circumference of the forearm at the widest part. If your measurement falls between two sizes, choose the larger one.

Shoulder

Provides light, dynamic stabilization and broad compression support for the rotator cuff muscles

MODERATE

Shoulder Wrap

Size	cm	inches
M	34 - 41	13.25 - 16
L	41 - 48	16 - 18.75
XL	48 - 55	18.75 - 21.5

How to select Shoulder Wrap

Measure the circumference of the arm at the shoulder joint. If your measurement falls between two sizes, choose the larger one.

Finger

Stabilizes the thumb using a moldable insert to provide custom fit and support

MODERATE

Thumb Guard

Size		cm	inches
S	a	8 - 9.5	3.25 - 3.75
	b	13 - 17	5 - 6.75
M	a	9.5 - 13	3.75 - 5
	b	16 - 20	6.25 - 7.75
L	a	13 - 15	5 - 6
	b	19 - 23	7.5 - 9

How to select Thumb Guard

Measure the distance from the first thumb joint to the base of the wrist and the circumference of the wrist. If your two measurements do not match the proposed combination, choose your size based on your wrist measurement.

a: Thumb Length
b: Wrist Circumference

Provides moderate support to stabilize the wrist joint by offering compression and support to the carpal bones

MODERATE

Wrist Band

Size	cm	inches
S	13 - 17	5 - 6.75
M	17 - 21	6.75 - 8.25

Ultra-thin wrist brace providing long lasting support with maximum support

MODERATE

FILMISTA
フィルムスタ WRIST

Size	cm	inches
S	13 - 17	5 - 6.75
M	17 - 21	6.75 - 8.25

How to Select Wrist Band and FILMISTA WRIST

Measure the circumference of the wrist at the narrowest part. If your measurement falls between two sizes, choose the one you like best based on its width.

Portable and reusable ice bag which is easy to carry around and can be used to ice any body part

Major ankle injuries

Inversion sprain

Swelling and/or pain appear around the lateral malleolus. It accounts for 90% of ankle sprains, which often occur not only during sports but also in daily life.

Cause

It is caused by extreme twisting of the outer side of the foot to inner side, for example when stepping on, lateral ligament is strained and damaged by the weight pushed outward.

Eversion sprain

Swelling and/or pain appear around the medial malleolus. It accounts for only 10% of ankle sprains.

Cause

It is caused by extreme twisting of the inner side of the foot to outer side, for example when stepping on, medial ligament is stretched to cause damage. Since a medial ligament is made very strong, it results to complex and severe injuries such as fractures and delamination in most cases.
