Basic operations

Power ON/OFF

Button operation

ON

Press the  button.
The ON/OFF lamp will light up in green, and the operation will start.

OFF

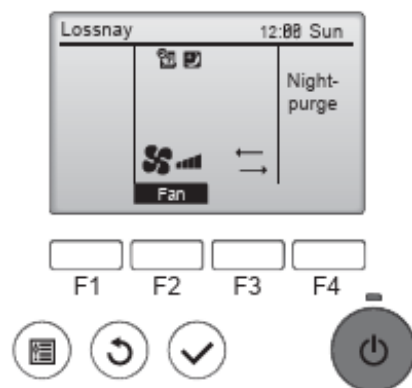

Press the  button again.
The ON/OFF lamp will go out, and the operation will stop.

Power ON/OFF during Night-purge operation

Button operation

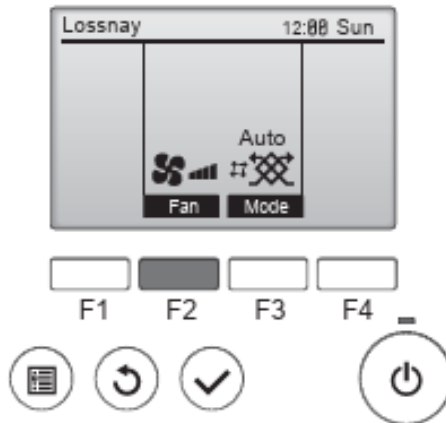

Press the  button during the night-purge operation.
The night-purge operation screen changes to the normal operation screen.
If you want to stop the operation, press the  button again.
The ON/OFF lamp will go out, and the operation will stop.

The night-purge operation starts automatically when the set condition is met.
For details, refer to the Installation Manual for the Lossnay unit.

Fan speed

Button operation

Press the **F2** button to go through the fan speeds in the following order.

Operation is not possible during external fan speed operation.

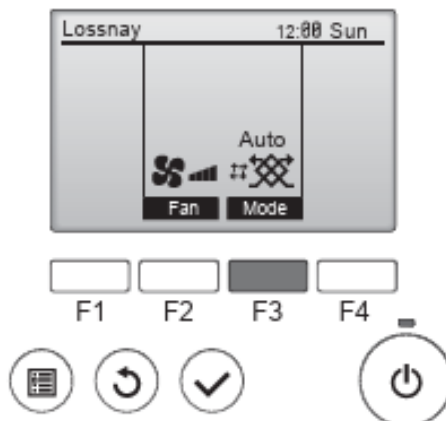

A fan speed that is skipped because of a fan skip setting is not displayed (refer to page 41).

When external fan speed input setting is used, Auto fan speed  appears between fan speed 4 and 1.

Ventilation mode

Button operation

Press the **F3** button to go through the Ventilation mode in the following order.

Operation is not possible during night-purge operation and external ventilation mode operation.
