

Looks digital. Operates like 1994.

Boardroom

You spent \$12M on dashboards.

Field

Your crew is still guessing.

37%

of warranty claims delayed
due to missing proof.

70%

of SOPs are skipped When
instructions are manual.

\$300,000

compressor outage caused
by a missing \$3 part

What do you think	What's really happening
Digital task flows.	Paper checklists taped to control panels.
Real-time updates.	Photos on phones, not submitted.
SOP compliance.	Guesswork and tribal knowledge.
Audit-ready data.	Text threads and verbal updates.

Your system isn't broken.
it was never built for the field.
