ATHEER

$1M a day — the real cost of playing telephone in oil & gas.

When critical field updates get delayed, distorted, or lost entirely, every hour can cost millions in downtime, rework, and safety exposure.

The problem & impact

37%
of warranty claims delayed due to missing proof.

$1M / day
Average downtime costs in oil & gas can reach (IDC).

40%
of safety incidents involve communication gaps.

$1M

- Delayed approvals stall production.
- HQ makes decisions on outdated or incomplete data.
- Missed KPIs lead to costly customer penalties.
- Small issues become major safety risks.

From broken telephone to crystal-clear execution.

Before

After

Stop playing telephone with million-dollar operations.
