

80% of field delays start after equipment leaves the shop.

If you can't see it, you can't fix it.

Oil & Gas operations spend millions every year reacting to problems that could have been prevented – simply because no one had real-time visibility once the job left HQ.

The visibility gap. (shop → field)

Equipment dispatched.

Work order printed.

After that?
Radio silence.

47%

of service leaders say they don't know if work is done right until after the customer escalates.

(Source: FSM Benchmark 2024)

The cost of blind spots.

Delays push projects off schedule.

Warranty leakage and rework climb.

Skipped steps raise safety risks.

Customers lose trust in service.

Missed visibility costs Oil & Gas operators

\$5,000,000+

annually in warranty leakage and lost uptime.

Atheer closes the gap.

Guided mobile workflows in the field.

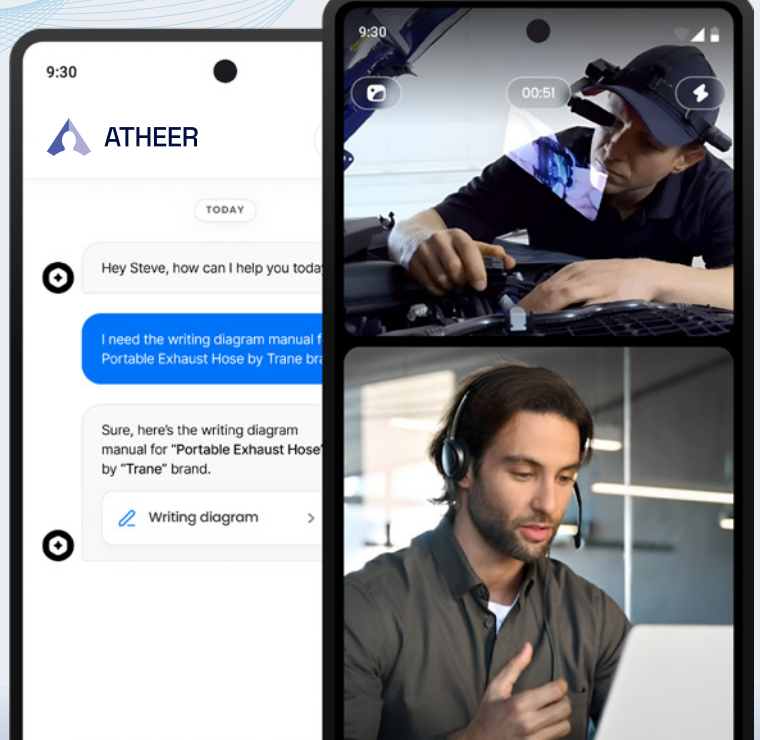

Step validation with photo + video proof.

Timestamps, geotags, and instant escalations.

Dashboards at HQ for live visibility.

40%

cut in service resolution time.

30%

reduction in repeat visits.

Bring clarity to last-mile execution.
