TENFOLD SECURITY

Managed SIEM

Cloud-Native Managed Security Information Event Management (SIEM). Logging and Monitoring of all your critical systems and applications with 24/7/365 Alerting and Response.

Simplify Security Operations, Find Threats Fast

WHAT IS SIEM?

Log Aggregation and Correlation
Simplify your threat hunting and incident response with one system to gather all of your log sources. Search and correlate information across multiple log streams in one interface.

Continuous Monitoring
Our Security Operations Center (SOC) continuously monitors all of your critical systems/applications for threats. Alerting and taking action when a threat is found.

Cloud-Native/Fully Managed
Connect all of your critical logs sources, no matter where they are. No backend managment, no coding and no maintenance.

Regulatory Adherence
Ensure ongoing compliance with minimal effort, reducing the risk of non-compliance penalties and enhancing your overall security framework.

WHY CHOOSE SIEM?

Seamless Integration
Our solutions integrate seamlessly into your existing systems, providing a hassle-free compliance experience

Proactive Threat Management
Stay ahead of potential threats and incidents with 24/7/365 monitoring and alerting for all of your critical systems and applications

Long-Term Archiving Included
2 years of log archiving included with every tier of the service.

SECURE YOUR BUSINESS TODAY
