

*Right Care, Right Time, Right Place.*

Joint Ai fast-tracks patients to the right level of care - delivering a better experience for surgeons, offices, and patients.

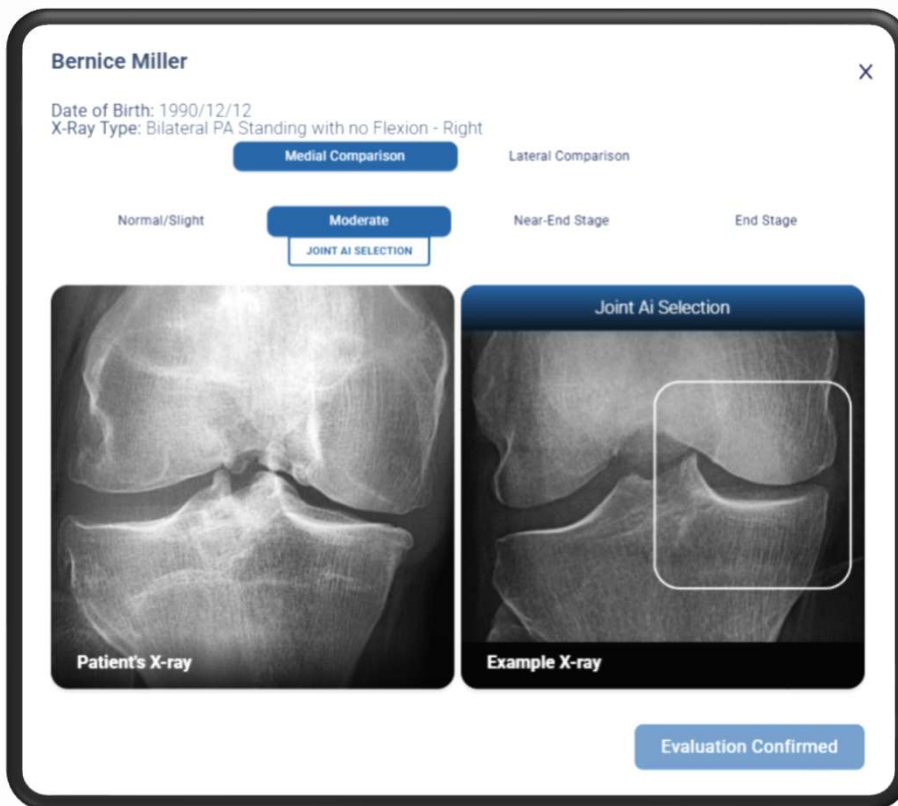

## Accurately diagnose and recommend the proper treatment plans for your hip and knee patients:

- Allows any staff member to match patients with the right provider at the right time – at 96% accuracy.<sup>1</sup>
- Ensures your physician schedule consists only of likely operative candidates.
- Improves the patient experience by reducing time to appropriate treatment

1. When compared to fellowship trained surgeons assessing patients in studies completed at two academic medical centers in a review of 1003 patients.

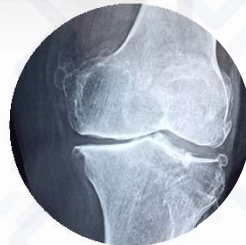

CAUTION – Investigational device. Limited by Federal (or United States) law to investigational use.

**Provides a great patient engagement and educational tool enabling the shared decision making process.**

Any staff member can triage a patient in minutes

Uses standard X-rays from your office, from any PACs

Generates PDF reports for patients as well as referring providers

Evaluates the level of hip and knee arthritis automatically and accurately
