Biography

She oversees the full board governance support cycle, from meeting planning, agenda development and board pack coordination through meeting execution and the preparation of minutes. She works closely with independent directors, investment managers, fund administrators, compliance professionals, auditors, legal counsel, and other service providers across multiple jurisdictions.

She brings extensive experience in corporate governance and financial services, including her work within the Corporate Secretary's Department of a major Canadian bank, where she supported a complex Capital Markets group. Her background also includes corporate and securities law experience with several of Canada's leading national law firms, providing a strong legal foundation that complements her work in fund governance.

Combining her legal, financial services and governance experience, Daneka has developed and optimized board support operations, strengthened workflow processes and document management practices, and overseen key vendor and supplier relationships.
