Curriculum Insight Snapshot

Curriculum Breadth & Coverage

This snapshot of curriculum moments spans both Key Stage 1 and Key Stage 2, with experiences captured from Years 2, 4, 5, and 6. The subjects represented include Mathematics, English, Science, and PSHE, with a notable focus across all moments on adaptive teaching and targeted support for pupils. Rather than a broad overview of whole-class teaching, these experiences highlight specific interventions, such as a small group maths session for pupils with additional needs and a dedicated group for emotional and wellbeing development, offering a view into how support structures are integrated into the school day.

The Curriculum in Action (Lived Experience)

A clear thread running through these moments is the application of practical and tangible resources to support focused learning. In Year 2, the use of real coins is noted as helping pupils maintain concentration during a maths activity, grounding abstract concepts in a concrete experience. Similarly, a Year 4 group exploring the feeling of worry uses a book as a tangible starting point for their discussions. This pattern of using physical and visual aids is also seen in the Key Stage 2 'Word Wall', which acts as a permanent visual support for vocabulary development across English and Science, demonstrating how the learning environment itself is used as a tool.

Capturing the Narrative Depth

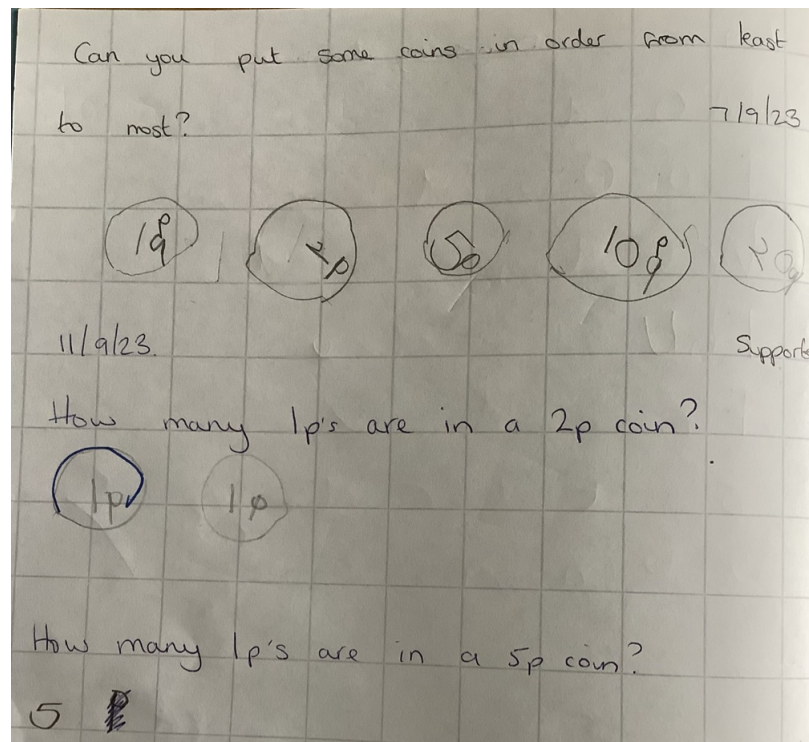

The level of detail captured in these moments, which connects specific activities to adaptive teaching strategies, provides a clear and valuable resource. A snapshot with this detail could be used to illustrate the school's inclusive practices during a subject review or to inform discussions with governors about how different pupil needs are being met across the curriculum.

"pod group year 2 money and maths" evidence

Today we had a group of children with additional needs working in the library. They were sitting with and supported by two TA's which was the ideal ratio revisiting the topic of simple addition subtraction using coins in a lovely quiet environment. It was a bit hot today, but because it was using real money, the children kept their focus for significantly longer than usual. yū

Overcoming Worries

Created by Mrs Eccles
Added 14/10/2021

"Overcoming Worries " evidence

In our Emotional and wellbeing development group we have been exploring the feeling of worry. Using the book as a starting point each week, the children recorded their ideas collaboratively about how worries grow when we pay attention to them and how, if we pay less attention to them, we can reduce the impact that worrying can have on us.
