

C&D ACCESS

Our Company

About Us...

At C&D Access, we are more than just a service provider. We deliver integrated solutions across engineering, fabrication, inspection, maintenance, access and civils, serving the bulk storage, petrochemical, oil & gas, renewables, utilities and power sectors.

Based in the United Kingdom, we deliver projects globally prioritising safety, and adhering to quality standards, schedule and budget.

Our Core Values

Be Open

We communicate in an honest manner, with trust and mutual respect. Honesty, sincerity and integrity are welcome within our organisation.

Value People

Professional development of our Team is at the heart of everything we do. Our company ethos is to work smart, share knowledge, and always help each other.

Customer Success

We deliver to requirements, on time and within budget, always striving to do better, bringing our knowledge and expertise to industry to make a safer environment.

Sustainable Growth

Creating a powerful brand has allowed us to build strong partnerships and continuously revise our business strategies to align our services in an ever-changing market.

Our Services

INSPECTION

Advanced & conventional inspection methods for steel structures and composite materials

FABRICATION & REPAIR

On-site & off-site fabrication and repair services

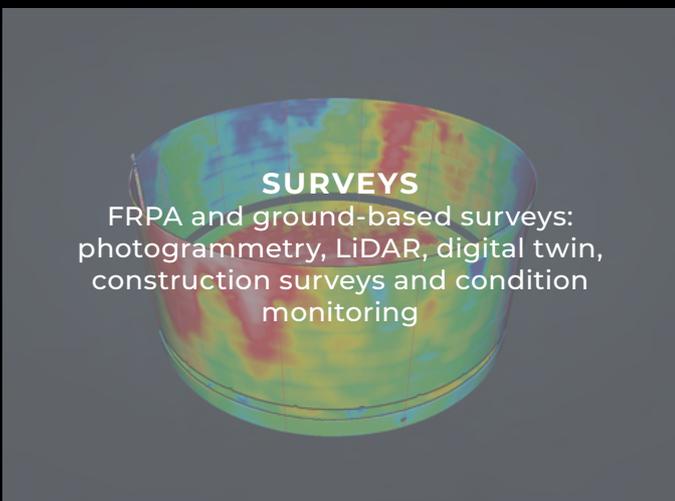

CIVIL ENGINEERING

Turnkey solutions from small to major projects

ENGINEERING

Integrated engineering solutions: design, procurement, and construction management

SURVEYS

FRPA and ground-based surveys: photogrammetry, LiDAR, digital twin, construction surveys and condition monitoring

ACCESS

Safe industrial access solutions: Rope access, suspended decking, confined space rescue cover and training

Our Services

MAINTENANCE

Tailored maintenance solutions to maximise asset performance and minimise downtime

RENEWABLES

Supporting renewable energy project throughout asset lifecycle

TANK FLOOR PREPARATION

Tank floor blasting: efficient, safe and environmentally friendly

TANK INSPECTION

Above ground flat bottom storage tank inspection expertise

Tank Inspection

C&D Access delivers tank inspection services for above-ground storage tanks, ensuring compliance, safety, and long-term asset performance. Our **EEMUA 159** and **API 653** qualified assessors perform both in-service and out-of-service inspections, supported by advanced NDT techniques.

Repair & EPC Support

Beyond inspection, we provide detailed repair recommendations and EPC (Engineering Procurement and Construction) scopes — from inspection through to repair, modification, and return to service.

Our Services

Fabrication and welding

Our 8000 sq ft facility handles carbon and stainless steel projects up to 4 tonnes with maximum dimensions of 12 x 4 x 4 meters.

With dedicated areas for surface preparation and coating, we can deliver large-scale, high-quality projects efficiently.

On-site capabilities

We provide a comprehensive range of on-site fabrication services tailored to client needs:

- ✓ **Pipework** fabrication and installation
- ✓ Mechanical equipment installation
- ✓ Pipe supports and secondary steelwork
- ✓ **Structural steelwork** fabrication and erection
- ✓ Decommissioning projects
- ✓ Storage **tank repairs** (EN 14015, API 653)

Welding Expertise & Qualifications

High-quality welding demands skilled professionals and rigorous standards.

- ✓ Welder examinations in accordance with ISO 9606 and ASME IX.
- ✓ Development and qualification of welding procedures tailored to both general and asset-specific requirements, meeting ISO 15614 standards.
- ✓ Quality system certified to **ISO 3834-2** and **EN 1090-1 for EXC2**.

Our Services

Non-destructive Testing

We provide conventional and advanced Non-Destructive Testing (NDT) to ensure asset integrity and minimise downtime.

By combining state-of-the-art technology with tailored inspection techniques, we give asset owners the reliable data needed for informed decisions, reduced risk and compliance.

C&D Access holds **ISO 17020** Inspection Body Type C accreditation.

Conventional NDT methods:

- ✓ Visual inspection
- ✓ Dye (liquid) penetrant inspection
- ✓ Magnetic particle inspection
- ✓ Eddy current inspection
- ✓ Ultrasonic inspection
- ✓ Thermography
- ✓ Hardness testing
- ✓ Leak testing (vacuum box)

Advanced NDT methods:

- ✓ Phased array ultrasonic inspection
- ✓ Time of flight diffraction
- ✓ Long range ultrasonic inspection
- ✓ Alternating current field measurement
- ✓ Magnetic flux leakage (MFL)
- ✓ Pulsed eddy current (inspection for CUI)
- ✓ Eddy current array
- ✓ Robotic crawler systems
- ✓ FRPA inspection (drone surveys)

Engineering

We combine multidisciplinary expertise to deliver full turnkey projects — from Front-End Engineering Design through construction and commissioning. By integrating all our service capabilities, we provide innovative, safe, and cost-effective solutions.

- ✓ FEED studies
- ✓ Engineering surveys
- ✓ Design briefs, specifications, and scopes of work
- ✓ 2D and 3D detailed engineering layouts
- ✓ Structural calculations
- ✓ Technical documentation
- ✓ Procurement and construction management
- ✓ Commissioning and handover

Our Services

Maintenance

We deliver tailored maintenance solutions that keep assets safe, reliable, and performing at their best. From preventative strategies to rapid-response repairs, our teams provide support across a wide range of industries, both onshore and offshore.

- ✓ **Fabric maintenance** - surface preparation and protective coatings
- ✓ **Tank lining systems** - application, inspection and repair
- ✓ **Thermal insulation** - installation and removal of thermal insulation, improving energy efficiency
- ✓ **Temporary repairs** - rapid turn-around solutions
- ✓ **Composite wraps** - on pipelines and tank shells, compliant with ASME PCC-2

Committed to Safety, Quality & Innovation

To maintain our commitment, we are constantly looking out for new technologies and state-of-the-art solutions that can help us to support our clients.

We invest in Research & Development to drive sustainable growth and adapt to an ever-changing market.

Our culture of care reduces avoidable harm by promoting transparency, learning from safety incidents and quality escapes, thereby driving quality improvement.
