

Easily Build Future-Proof Workflows, Forms, and Business Applications for SharePoint.

Extend SharePoint workflows into end-to-end automation by connecting to over 120 line-of-business systems, including Salesforce, SAP, DocuSign, Teams, AWS, Azure, ML, LLM, and more.

AgilePoint composable workflows eliminate the headache of repetitively refactoring, rebuilding, or migrating SharePoint workflows.

AgilePoint-enabled SharePoint workflows work seamlessly with any SharePoint version and updates without requiring refactoring or rebuilding and are future-proofed to be Agentic AI-ready.

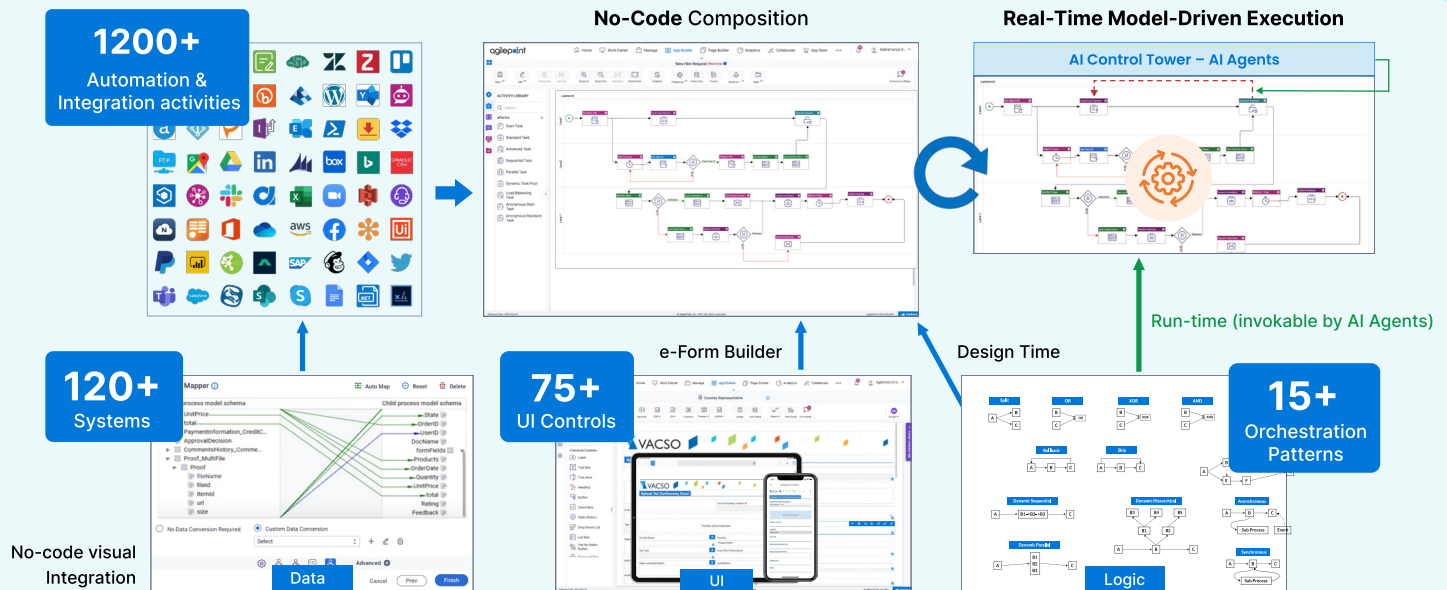

The Futureproof Enterprise Composable Workflow-as-a-Service Platform for SharePoint and Beyond

The AgilePoint NX engine operates independently of SharePoint Server on-premises and SharePoint Online in Microsoft 365, allowing workflows and forms to be SharePoint version-agnostic, SharePoint-independent, and Agentic AI-ready.

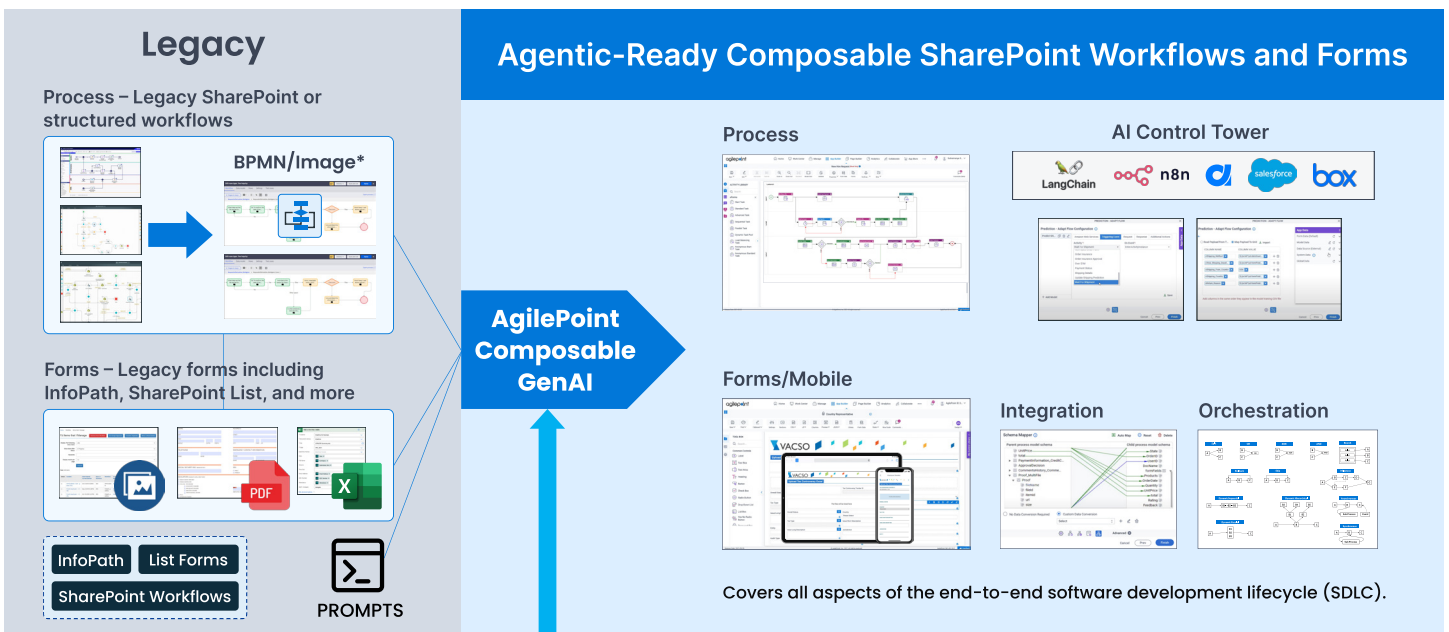

Quickly compose responsive process apps by leveraging SharePoint/ Microsoft Office 365 and other Cloud Services without writing code.

Built-for-the-Future:

All SharePoint workflows created with AgilePoint are inherently Agentic AI-ready.

SharePoint Server on-prem, SharePoint online/Microsoft 365, and other Tech Stacks
