

Build a stronger, more profitable MSP

**Technology should support
your business goals—not stand
in the way of them.**

As your business grows, increasing operational complexity can make it harder to stay efficient, profitable and ready for what's next.

ProfitFuel is Kaseya's consultative business assessment that helps MSPs align technology decisions with business goals. Through tailored recommendations, we help you improve efficiency, strengthen profitability and build a roadmap for long-term growth.

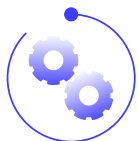

Why ProfitFuel?

More than a vendor. A strategic partner.

Most technology conversations begin with products. **ProfitFuel starts with your business.**

We take the time to understand your business, goals and operational challenges before recommending technology. Every recommendation is tailored to your priorities—not a predefined technology approach.

What you'll achieve

Improve operational efficiency

Identify opportunities to simplify operations and eliminate unnecessary complexity.

Increase profitability

Align technology investments with your business priorities to maximize value.

Standardize your technology

Reduce vendor sprawl and create a more connected technology strategy.

Build a roadmap for growth

Develop a clear plan that supports your business today and into the future.

How ProfitFuel works

A collaborative four-step process designed around your business.

1 Understand	We learn about your business, goals and operational challenges.	Outcome Clear business priorities.
2 Assess	We evaluate your technology, vendors and workflows.	Outcome Opportunities to improve efficiency and performance.
3 Recommend	We develop tailored recommendations aligned to your business goals.	Outcome A prioritized roadmap.
4 Grow	We help you implement your roadmap with ongoing strategic guidance.	Outcome Sustainable business growth.

Proven business outcomes

ProfitFuel has helped MSPs:

60%

Reduction in annual technology spend

1,500+

Customers supported on a unified platform

50,000+

Endpoints under management

"Kaseya is the difference between a partner and just another technology vendor. We needed to standardize our technology stack while minimizing vendor relationships—and that's exactly what ProfitFuel helped us accomplish."
