Introducing Canine Spectra 5, a 5-way modified-live virus vaccine designed for healthy dogs 6 weeks of age or older. This vaccine offers rapid immunity and cross protection against canine distemper, adenovirus type 2 (CAV-2), hepatitis, parainfluenza, and parvovirus type 2b. The high-titer, low-passage formula provides effective protection for dogs. To administer the vaccine, mix one dose with a sterile solution and inject 1 ml subcutaneously or intramuscularly starting at 6 weeks of age. Avoid vaccinating pregnant animals. Q: How often does my dog need the DHPP vaccine? A: Initially, your dog should receive one dose, followed by a second dose 2-3 weeks later. Annual revaccination is recommended. Q: What's the difference between DHPP, DAPP, DA2PP, and 5-way vaccine? A: These names all refer to a 5-way vaccine that helps prevent canine distemper, adenovirus type 2 (CAV-2), hepatitis, parainfluenza, and parvovirus type 2b - just like Canine Spectra 5. Important information: Anaphylactoid reactions may occur. If an adverse reaction happens, the antidote is epinephrine. The U.S. Lic. No. for this vaccine is 196. Canine Spectra vaccines offer a complete line of multi-protection, combination vaccines that provide peak protection for major health risks of dogs. With simple instructions and huge savings, owners, breeders, and shelters can easily give their own shots at home. USDA-approved for purity, potency, and efficacy. Are you searching for affordable, hassle-free dog vaccines that ensure the health and well-being of your furry friend? Look no further than Canine Spectra Vaccines! As a trusted manufacturer, we offer a range of single-dose, multi-protection vaccines approved by the USDA. Our comprehensive portfolio includes essential and risk-based vaccinations to protect against serious viral and bacterial diseases. Our spectrum of dog vaccines covers: * Adenovirus Types 1 & 2 * Borrelia burgdorferi (Lyme Disease) * Bordetella bronchiseptica (Kennel Cough) * Coronavirus * Canine Hepatitis * Distemper * Leptospirosis * Parainfluenza * Parvovirus For a safe and effective vaccination experience, follow our instructions on VaccinateYourPets.com, call the helpline at 1-800-821-5570, or email info@VaccinateYourPets.com. Remember to consult your veterinarian with any questions or concerns. As a responsible pet owner, you want the best for your dog.
