# City of mist leveling guide

Please remove ad blockers to support our website. City of Mist - Kunark Leveling Guide The City of Mist is a fantastic leveling location in the entire game. Enemies here hit hard for their level but have lower HP, making it easier to progress. This zone has a high ZEM, making a noticeable difference. For players between levels 35-40 with a group, we recommend sticking around the Emerald Jungle zone line. The mobs in this area are the lowest level in the zone and if you get overwhelmed, the ZL is nearby. Best locations to camp are on the north or south side of the map above the blue circles. Once your group reaches 40+, you can gradually move into the purple circle. As you progress further west, enemies increase in level. Stay in the purple circle until at least 45+ before moving to the western part of the zone. The red area is the most challenging and leads to upper levels with the toughest monsters. War Bone Overlord: Calcified Bone Gauntlets, Shield of the Mist Captain of the Guard: Red Silk Lined Boots, Plaguebone Warlord: Mysterious Glowing Sleeves, Simple Cape of the Seer Gyrating Green Slime: Mystical Gyrating Necklace, Slimy Green Ring Dread Wraith: Ornate Rune Blade, Ornate Rune Shield, Brass Stud of Wonder Mighty Golem: Mace of the Shadowed Soul Additionally, The City of Mist has one of the highest ZEMs on Kunark and is connected to Emerald Jungle. Wizards and Druids get a port to EJ, otherwise, you'll need to reach it through Field of Bone or Cabilis Stone if PoP is out. If you're interested in trying out City of Mist for free, check out the Quick Start Rules on the game's website. This set replaces the original starter rules from 2016 and includes a rulebook, character sheets, tracking cards, and reference sheets for players and the Master of Ceremony (MC). You'll also get 7 pregenerated character folios, featuring characters like Kitsune and Salamander, as well as two sample cases: V is for Going Viral and Demons in Cross End. To access these resources, sign up on the Free Resources page and receive a link to download the Quick Start pack. For a more immersive experience, consider purchasing the City of Mist Starter Box. This includes a player booklet and an MC booklet that guide you through the starter case Shark Tank, which is designed for new players. The box also contains 5 pregenerated character folios featuring the All Seeing Eye Investigations Crew, as well as tracking cards, location maps, and custom dice. If you're eager to dive straight into the game, you can purchase the City of Mist Player's Guide and MC Toolkit. The guide includes tools for creating characters and the cinematic game rules, while the toolkit provides an in-depth look at each District in the city, along with tips for running sessions and writing cases. It also features a list of Dangers to throw at your party, including Avatars that secretly rule the City. The game's connection to Death is a pivotal point for players once they start linking cases together. This opens up opportunities to create new stories by using character profiles from the MC Toolkit. The Player's Guide and MC Toolkit can be obtained separately or as part of various sets, such as the Core Set or Ultimate Set, which also includes expansions and character folios. Beyond game components, there are multiple ways to engage with City of Mist. The website at cityofmist.co features character profiles for a deeper understanding of the game's inhabitants. Actual play videos on YouTube offer real gameplay experiences, including a one-shot by Amit Moshe, the game's creator. This channel also hosts playlists like City of Mist 101 for learning the basics and tips guides for advanced players. To engage with the community, visit the City of Mist Discord, subreddit, or Facebook group linked in the description. These platforms are ideal for interacting with experts who can answer questions, brainstorm ideas, or even find new players for your game. A video titled "5 Ways to Find Other City of Mist Players" provides additional insights into building a player base. The community is eager to hear about your experience starting out with City of Mist. Share your story in the comments, on social media, or within the City of Mist Discord to contribute to the conversation and learn from others.
