Setup instructions can be found in the product manual, which also contains operating guidelines. Professional Series Ionic Breeze Silent Air Purifier with OzoneGuard SI857 - Read this manual and save it for future reference. Important warnings and information are provided below. ****Warranty Information**** When using any electrical appliance, always follow basic precautions to avoid fire, electric shock, or injury. This product operates at 110V AC and 50Hz or 60Hz only. It must be connected to a properly grounded outlet and used indoors only. Before unplugging the unit, turn off all controls. Never pull the cord; instead, grasp the plug itself when unplugging from an outlet. ****Safety Precautions**** Do not pull or lift the power cord by its handle. Keep it away from heated surfaces and avoid using it as a door closer or pulling it around sharp edges. If the cord is damaged, only qualified service personnel should replace it. Do not attempt to open the unit, as this will void your warranty and could lead to serious damage or injury. ****Important Information**** The collection grid can trap water in its many edged areas. Ensure the grid is completely dry before reinserting it into the unit. If water is used for cleaning, allow at least 24 hours for the grid to dry completely. This air purifier should not be located near a fireplace, whether or not the fireplace is operational. ****OzoneGuard Functionality**** With OzoneGuard in place, ground-level ozone and its by-products are converted into oxygen before circulating back into the room. The OzoneGuard is smaller than the grill itself due to the majority of air output being directed toward the center of the grill. ****Setup and Operation Instructions**** This equipment features a grounding-type plug with a third pin for safety. Only use it in grounded 110V outlets, and do not alter the plug in any way. Place Ionic Breeze on a level surface at least twelve inches away from walls and furniture, then plug into a grounded outlet. ****Normal Operation and Mode Control**** The unit operates normally by alternating high and low air movement through programmed cycles. To override power control settings and run at maximum power for five minutes, use the mode control feature. Boost/Ions until the button turns blue to activate the previously selected power level. To turn on the Negative-Ion Feature, press Boost/Ions until the button turns green. Remember to clean the collection grid every one to two weeks; a reminder light will turn green after two weeks, and red if there's excessive dirt or circuitry problems. If you notice noise during operation, perform a thorough cleaning of the grid, grills, and internal ionizing wires. To clean the unit, unplug it first. Release the OzoneGuard front grill and back grill by lifting the blue release tabs on the bottom. Remove the grill by sliding it up. Note that the OzoneGuard cannot be detached from the front grill, as it has sharp edges; use caution when cleaning. For exterior cleaning, mix one part household bleach with five parts water or use a bleach-based spray cleaner. Allow the surface to dry completely before plugging in. The removable stainless steel grid collects most particles, and debris will accumulate inside the unit over time. Statement of FCC Compliance: This equipment has been tested and found to comply with Class B digital device limits under Part 15 of the FCC Rules. For any issues or concerns, refer to the statement below: ****Reorient or relocate the receiving antenna. • Increase the separation between the equipment and receiver. • Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. • Consult the dealer or an experienced radio/TV technician for assistance. This product comes with a five-year warranty, covering defects in materials or workmanship. However, it does not cover damage caused by misuse or use other than as intended and described in the product instruction manual, or loss or damage to batteries or removable parts. Information regarding the safe use and maintenance of the Ionic Breeze air purifier. Statement of FCC Compliance14**Table of ContentsPage 56 ****Safety Precautions**** • Ensure the unit is placed on a stable surface, away from heat sources and flammable materials. • Keep children and pets away from the device to avoid accidental exposure or tampering. • Never use the Ionic Breeze near open flames, candles, or oil lamps. • Regularly clean the collection grid to prevent dust buildup and ensure optimal performance. • In areas with heavy pollution or smoke, clean the collection grid more frequently to maintain effectiveness. • If the unit starts to arc or make a "static-like" sound, immediately turn it off and replace the collection grid. ****Precautions for Safe Use**** • Always follow the manufacturer's instructions and guidelines for use. • Never attempt to open or disassemble the device without proper authorization from the manufacturer. • Be cautious when handling electrical components, as they may be fragile or hazardous. 1. To install the Ionic Breeze properly, contact qualified personnel and follow safety guidelines. Ensure the device is placed on a level surface, away from walls and furniture. 2. Plug the device into a grounded 110V outlet, taking care not to alter the plug in any way. For optimal performance, adjust the MODE CONTROL setting: - SMALL: Suitable for small rooms or areas with frequently closed doors. - MEDIUM: Ideal for average-sized rooms. - LARGE: Best for large rooms and high-traffic areas.
