Work experience

Directorate for Indirect Taxation

Apr 2019 - On-going

Department for Information Technologies

Responsibility:

- Development and maintenance of web application using Asp.Net | Asp.Net MVC 5.
- Used knowledge from Microsoft SQL Server Management Studio to design and maintain highly efficient databases for web applications.
- Cooperation with working groups, working teams (developers) to ensure quality delivery of projects.
- Participating in team meetings and contributing to the development of business processes for web application development.
- Continuous research and adoption of new technologies and approaches to ensure the application of the most effective development practices.

Achievements:

- Led the development of a web application for data exchange with the Ministry of Finance and Treasury, which resulted in an increase in the efficiency of our internal operations, and reduced the risk of abuse and fraud.
- Cooperation with the Department of Customs on the implementation of the subsequent System of Customs Control of Employees has significantly improved the efficiency and effectiveness of the exchange of employee information that is used daily in work, directly affecting the amount of calculated indirect taxes. As a key member of the project team, I played a key role in the development and improvement of the Post Customs Control web application. This experience allowed me to apply my skills in a practical environment, contributing to its success and strengthening control by minimizing illegal activities within the custom domain.
- Actively contributed to the development of software development best practices, sharing knowledge and expertise with team members and mentoring junior developers.

Television K3

2017 – 2019

Graphic design, Prnjavor

Responsibility:

- Designed graphics and visual elements with Adobe Creative Suite and CorelDRAW. Edited Video content with Adobe Premiere Pro and maintained the operation of the server room.
- Managed projects, provided technical support and maintained the digital asset management system.

Achievements:

- Increased viewership, generated more revenue, maintained a server room with zero downtime and improved workflow efficiency.

Skills:

- Graphic design and video editing with Adobe Creative Suite, CorelDRAW and Adobe Premiere Pro, strong communication and problem solving, and experienced in TV/media production.
