

# Simplify your POS experience using mobile

Meet the new, redesigned Mobile POS

## Discover an intuitive interface

Imagine a plug-and-play UI that lets employees manage all aspects of their appointments without intensive training or errors.

Our simplified navigation means anyone can effortlessly handle appointments, coordinate with team members, instantly check-in/out guests, update invoices and more.

## All your employees need at their fingertips

Designed to simplify everyday tasks, our Mobile POS enhancements empower staff to:

Search for invoices by booking source

Split commissions between multiple service providers

Accept multiple modes of payment against an invoice

Validate retail stock in real-time

Add additional services, retail, gift cards, memberships or customized discounts with a single click

Activate dropdowns for membership/package benefits with easy scroll, reduce the number of alerts, add retail products to the invoice & more

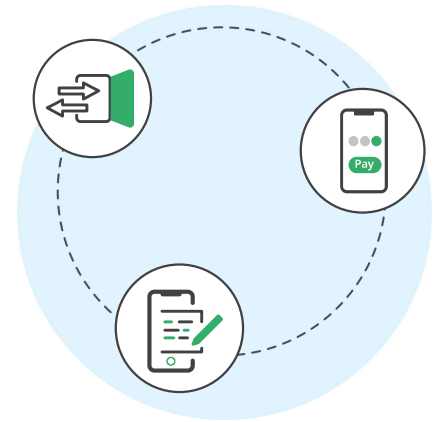

**Maximize productivity and minimize frustration to deliver the most consistent experience to customers, employees and business managers across all locations.**

## Impress your guests with a smooth, elevated experience

**Fast check-in/check-out:** Eliminate wait times as staff can upsell and process payments at the service chair.

**Safe, contactless interactions:** Reduce front desk touchpoints by empowering employees to complete appointments on their mobile.

**Customized experience:** Add a personal touch with guest service history, details and preferences available at the provider's fingertips.

## Streamline and simplify with Zenoti Mobile POS

### Clutter-free UI

An easy-to-navigate interface that eliminates time-consuming searches and doesn't require intensive training.

### Seamless integration

Fully integrated with appointment book, CRM, inventory and all other Zenoti features.

### Appointment workflow management

Easily view and manage every step from booking appointments to check-in, adding additional products/services, invoicing and check-out.

### Mobile experience enhancements

Includes membership/package benefits, reduced alerts, upfront editing of retail and more.
