

Seamlessly integrate your data with the accounting system you know and trust!

Running a business is complex. We're here to make it easy. Automate your bookkeeping and seamlessly integrate your data in Zenoti to your accounting systems. We integrate with QuickBooks' (online and desktop) as well as Xero accounting software.

Eliminate manual errors & efficiently manage

Profit and loss statements

Balance sheets

Cash-flow statements

Save time & efforts with auto-sync

With Zenoti, auto-sync your data based on the following options:

Organization
vs Center level

Organization - Single configuration transactions across all the centers. Better suited for company-owned businesses.

Center level - Configure transactions across each center. Recommended for businesses with franchisees.

Invoice-wise
vs Summary of the invoices

Summary of the invoices - Cumulative day-end summary

Invoice-wise - Account for each invoice separately

Invoice
vs Journal entry

Invoice - Invoices in Zenoti are posted as invoices in the Accounting application

Journal entry - Invoices in Zenoti are posted as journal entries in the Accounting application

Maintain data & financial accuracy across your business

Our accounting integrations allows you to manage your data across multiple locations, ensuring consistency and accuracy for your overall business. We also help you manage your inventory costs.

Configure your data to meet your business needs

Define your data in groups based on categories, sub-categories, or a default item type.

Sync your cost of goods sold from Zenoti to your accounting application
