Bed Locator Bed Docking Station

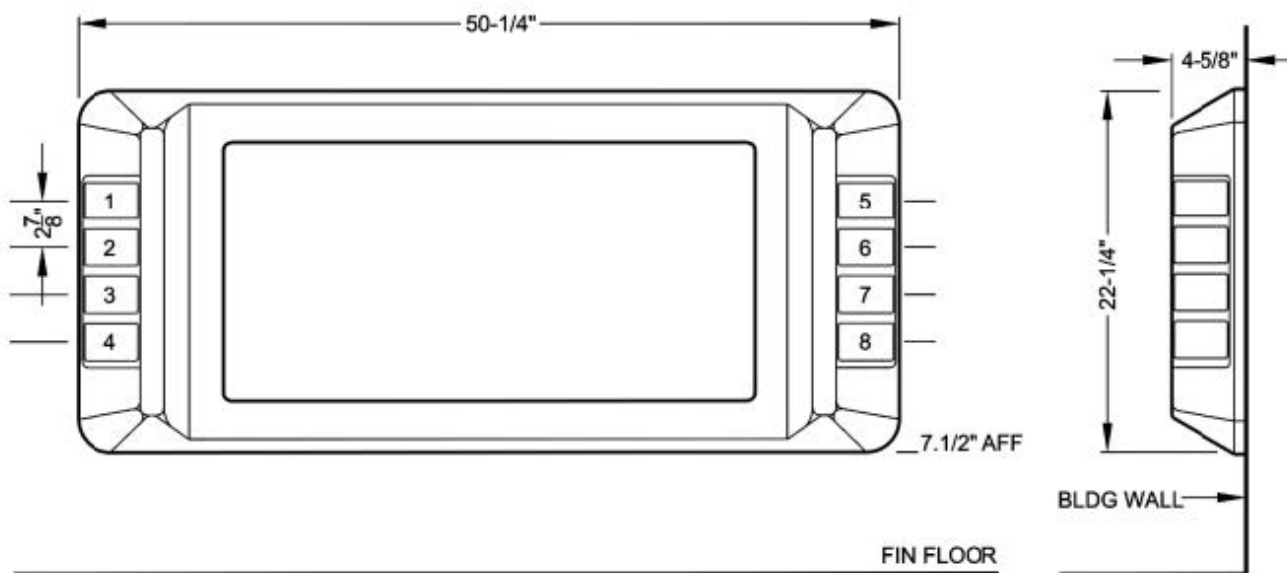

The Bed Locator & Docking Station is provided to properly position the patient bed as well as protect the room walls. Space for four electrical devices is provided on each side. The exposed face is manufactured from single seamless, high impact plastic which makes it strong and easy to clean. Standard in Polar White, other colors are available.

Features/Specifications:

- High Impact, industrial-strength Kydex® construction
- Seamless easy-cleaning surface
- Devices angled away from the bed to prevent damage
- Low voltage lighting controller can be provided within the Bed Locator
- Available in custom colors at additional price
- Can be equipped with a wide range of electrical receptacles and low voltage services
- 50 lbs unit
- Can be mounted back-to-back with offset rough-ins
