Experience

Accenture - Custom Software Engineering Specialist 06/2022 - present

General Activities for Frontier AI Lab Client Account 04/2026 - present

- Scouted and vetted candidates for ads solutions engineering role -- interviewed candidates.

Product Lead for Account Hub Internal Tooling initiative 04/2026 - present

- Executing a Senior Manager's vision for org-wide internal tooling improvements by setting up the foundations for a 0-1 pilot stage with internal Major AI Client Account team.
- Delegated lead engineering work to analyst team-mate seeking an opportunity to showcase their engineering skills.
- Wrote SOPs and instituted dogfooding practices while iterating on views and feedback for frontend UX across the Account Hub. Focused on prioritizing the highest leverage, lowest lift features, using AI tools to execute.

Product Feeds Lead at Frontier AI Lab client 12/2025 - present

- Coordinate cross-functionally between engineering, partnerships, UserOps, product, and GTM to cut through chaos within a workstream that touches 2 product areas.
- Evolve an inherited internal tool with feature updates as product demand scales.
- Partner with external merchants and 3Ps to align product feeds, streamline onboarding, and handle post-launch questions and evolving product updates.
- Scale merchant onboarding from 10-100 and suggest scalable processes to clients.

Full Stack Java Developer at Public Services industry client 3/2024 - 11/2025

- Developed and orchestrated the release of 3 system change requests, working with other teams and delegating some work to offshore teammates.
- Implemented 15 defect resolutions; resolved and closed 358 team incidents during my time on the client account. Overhauled the implementation of a piece of new functionality that had many defects tied to it and fixed an undiscovered bug in the process.
- Worked with Java, Java Server Pages, and IBM Rules Designer for monthly releases for a website serving 20,000 workers and enabling 2 million downstream clients to receive services.

Volunteer Developer for Non-profit Startup Mobile App 1/2024 - 12/2024

- Spearheaded design for new admin web dashboards using Figma. Augmented buildout of the web dashboard with Lovable. Acted as a solo Flutterflow developer to improve user experience and app performance with Flutterflow, Powersync, and Supabase before other Accenture team members joined.
- Coordinate communications between Accenture and the client teams to navigate design and development work.

Education

Cornell University - Master of Engineering in Computer Science 12/2021

B.S. in Electrical and Computer Engineering 5/2021

Relevant Coursework: Science Writing for Media, Intelligent Physical Systems, Computer Vision, Natural Language Processing, Autonomous Mobile Robots

Skills

Technical: Python, Java, SQL, Flutter, Web Development, Mobile App Development

Functional: Requirements Analysis, Requirements Gathering, Stakeholder Management

Tools: Codex, Claude Code, Jira, ServiceNow, Figma, Mural, Webflow, Flutterflow, Powersync, Supabase, Lovable, AWS
