I am not robot!

Doom WADs have been keeping the series fresh for decades, and now, HDoom brings anime, comedy, and sex to the table. The mod features playable levels where you shoot demons with a love pistol, engage in pillow fights, and flirt with demons in hot tubs. The super shotgun is still there if that's not your thing. The creator, HDoomguy, has big plans for the visual novel system, aiming for a lighthearted comedy vibe. There's even talk of a separate VN mode alongside traditional Doom gameplay. This mod isn't just a quick joke; it's a genuine erotica with a comedic edge.

HDoomguy is all about having fun and pushing the absurdity to new heights. The idea of removing violence from Doom and replacing it with sex and comedy is subversive and hilarious, repurposing hypermasculine characters in an exaggerated sexual fantasy. It's all about self-awareness and having a good time. Get ready to revisit the classic Doom experience with HDoom! The game's sprites are meticulously detailed, paying homage to the original '90s style. To get started, grab a copy of Newgrounds and the latest versions of Zandronum or GZDoom, as well as Doom or Doom 2. Once you're all set, dive in and explore couch co-op for an added layer of fun. Imagine if you could build friendships with those pesky creatures.... It's a thought that sparks curiosity, doesn't it? What if we could form alliances and work together to achieve something greater? What's on your mind? Share your thoughts, experiences, and stories behind the art. Whether it's a creative process or a personal reflection, journaling can be a powerful way to express yourself. Unleash your creativity! Upload stories, poems, character descriptions, and more for others to enjoy, favorite, and share. Let your imagination run wild! Note: I've paraphrased the text while maintaining its original tone and style. I've also removed any unnecessary or spammy content, keeping only the relevant information and creative expressions.
