Thank you for taking the time to browse our latest **Kapatal Brands** product catalog, focused on MIPA paints and ancillaries for the automotive, commercial, and industrial sectors.

Please note:

While this catalog showcases the core range of products we stock, MIPA offers a much wider selection through their global portfolio. We have carefully selected and imported only the most in-demand and proven products, so that we can ensure consistent supply, quick turnaround, and reliable stock availability for our distributors across Sub-Saharan Africa.

This strategy allows us to support our partners efficiently- helping them avoid long lead times and product shortages.

If there is specific MIPA products not featured in this catalog but available through MIPA internationally, we are happy to assist. These items can be imported by sea, with a lead time of approximately 2 to 3 months.

For urgent requirements, we also offer the option of airfreight products at your cost.

We appreciate your continued support and trust in Kapatal Brands. For anything beyond this catalog please don't hesitate to reach out to our team- we're here to assist.

Please refer to our price list for product codes and availability.

NB: All stock subject to availability.

WELCOME

TO KAPATAL

Kapatal Brands was founded over 12 years ago with a clear mission to supply distributors across Sub-Saharan Africa with access to premium, globally respected automotive, commercial, and industrial brands.

We do not sell directly to bodyshops or end users- our focus is on supporting distribution partners with trusted, proven products, technical knowledge, and reliable service that helps them grow confidently.

We proudly import and represent a carefully selected range of international brands:

- MIPA Paints- High-performance coating from Germany.
- Smirdex Abrasives- Top-tier abrasives from Greece.
- Tube Spray Guns- Dependable spray equipment from China.
- Various Consumables- Sourced from trusted European suppliers.

What sets Kapatal apart is not only the quality of our products but also the knowledge behind them. Our technicians are trained in both Germany and Greece, and have also undergone structured training in our own in-house training centre, ensuring they understand application, performance, and support from the ground up. Every product we offer has been personally tested by our team over the past decade, and the results are clear- our customers remain loyal because the quality speaks for itself. With customers spread across Sub-Saharan Africa, and as the official agency for our brands in the region, we are committed to providing reliable supply, technical support, and long-term partnership to every distributor we serve. At Kapatal Brands, we stand behind every product, every order, and every relationship- with a foundation built on quality, trust, and performance.

Empowering Surfaces, Embracing Africa

MIPA COMMERCIAL

CRAFTING EXCELLENCE, EMBRACING HERITAGE

Mipa commercial coatings have been developed for a wide range of substrates and requirements. Depending on the size of the company, the techniques used, the objects to be painted and the required characteristics, MIPA always has an optimal overall concept.

The tinting system MIPA PUR-HS ensures immediate availability of thousands of different shades, also for completely newly developed paint products – and that even for the smallest purchase quantities.

FILLERS

Sculpting Surfaces with Precision.

Mipa's Fillers are the cornerstone of perfect surface preparation. In this section, you'll find a range of fillers designed to smooth out imperfections and create an ideal base for painting. Each product is formulated with precision, ensuring that surfaces are not only even and smooth but also primed for the best possible paint adhesion. From automotive repairs to industrial applications to commercial use, our fillers lay the groundwork for a finish that epitomizes excellence.

Explore our Fillers and discover the key to achieving a perfectly prepped and pristine surface.

Empowering Surfaces, Embracing Africa.

P118 Ultra Light Filler

The Pinnacle of Smooth Surfaces.

Self-levelling 2K polyester lightweight body filler of low viscosity to even dents and irregularities in car repairs. Mipa P 118 Ultra PE-Leichtspachtel is characterized by its very smooth surface without pores which allows skipping the application of fine putty. Mipa P 118 Ultra PE-Leichtspachtel can be sanded already with high abrasion after a short drying time.

SIZES:

Size:1L -Product Code:296010000

Size:3L -Product Code:296030000

P80 Filler

Elevating Lightness and Ease.

Mipa P 80 is a high-quality two-component body filler based on polyester resin with lamellar pigmentation. It adheres on iron, steel, aluminium, zinc, GRP and wood. Mipa P 80 Kaltmetall is easy to apply and, after a short drying time, it can be well sanded without producing a lot of dust. It is characterized by its excellent adhesion and bending resistance.

SIZES:

Size:1KG -Product Code:288810000

P90 Easy Body Filler

The Art of Simple Sanding.

Mipa P 90 Easy is a very easy-to-sand two component body filler based on polyester resin which provides adhesion on iron, steel, GRP and wood. In order to close possible pin holes a further layer of Mipa P 85 or Mipa P 60 S PESpritzfüller can be applied. Mipa P 90 Easy can be sanded with high abrasion even after 24 hours.

SIZES:

Size:1KG -Product Code:288110000

Size:4KG -Product Code:288160000s

P51 Filler

Reinforced Strength For Durable Repairs

Mipa P 50 is a polyester resin-based two-component glass fibre body filler without asbestos. Due to its proportion of glass fibres the product is particularly suitable to bridge gaps, little holes and perforations caused by corrosion in substrates of iron and steel, aluminium as well as to repair GRP and wood.

Size:1.8KG -Product Code:292020000

PUTTIES

Filling Surfaces with Hope.

With an extensive overall assortment, MIPA offers a variety of different putty qualities for outstanding results. This includes multi-purpose fillers for universal use, body fillers, soft fillers and fibre fillers. Spray fillers, epoxy-based putties or various special types are also part of the extensive product range.

Empowering Surfaces, Embracing Africa.

P85 Fine Putty

Extra Thin Layering.

Mipa P85 is a bright white, easy-to-sand, two-component putty based on polyester resin. It offers excellent adhesion on iron, steel, GRP, and wood, making it an ideal choice for fine finishing work. The fine particle size and outstanding hiding power of Mipa P85 make it perfect for use as a covering and fine putty, applied in thin and very thin layers.

Size:1KG -Product Code:288310000

P35 Plastic Filler

Flexible Plastic Parts Filler.

Mipa P 35 Elastic is a flexible body filler and putty which is perfectly suitable for overcoatable plastic parts and which enables the shaping of contours. Very good adhesion on steel, aluminium, GRP and wood, high flexibility, short drying time and easy to sand.

Size:1KG -Product Code:290310000

N30 Filler

One-Component Efficiency.

Mipa N 30 is a one-component putty based on nitrocellulose. It provides adhesion on iron, steel, GRP, wood and cured, sanded old paintwork.

Size:250g Grey Tube -Product Code:289350000s

Porenwisch

Detect Fine Scratches

Porenwison is a specialized product used to detect and highlight surface imperfections—such as pinholes, pores, or fine scratches—during the refinishing process. It is typically applied before the final coating stage to ensure a flawless finish by revealing defects that may be invisible to the eye. Ideal for use on primers and filler surfaces, Porenwischer helps ensure high-quality, smooth results in automotive and industrial applications.

Size:250ML -Product Code:224900000

P67 PE Spray Filler

Filler

P67 PE Spray Filler is a high-build, two-component polyester spray filler designed for fast and efficient surface leveling. Ideal for repairing large uneven areas, it provides excellent filling power, easy sanding, and strong adhesion to metal, fiberglass, and existing paintwork. Suitable for use in automotive refinishing, it ensures a smooth, uniform surface ready for topcoat application.

Size:1KG -Product Code:287710000

PUR-HS MIXING BANK

Commercial Paint perfect for South Africa

MIPA PUR-HS Commercial paint offers perfect colour matching through a precise, formulation-based system—allowing any colour to be mixed in any volume required. With its high spread-rate of 10 to 14 square metres per litre, it ensures efficient coverage and consistent, professional results every time.

Any Colour to Any Volume

PUR-HS COLOUR SYSTEM

Scan, Mix, Paint.

MIPA offers a full commercial colour swatch system, precise spectrometer scanning for automotive and commercial colour matching, and access to an extensive, up-to-date colour database for consistent, accurate results every time.

Over 1000 Colour Codes.

COMMERCIAL PRIMERS

SOLVENT

Built to Last: Primers That Perform

MIPA Primers for Commercial Vehicles are engineered for maximum adhesion, corrosion resistance, and durability. Designed to perform under tough operating conditions, they provide a strong foundation for topcoats, ensuring long-lasting protection and a smooth, professional finish on trucks, trailers, and fleet vehicles.

Empowering Surfaces, Embracing Africa.

EP 100-20 Primer

Transforming Automotive/Industrial/Commercial Aesthetics.

The Mipa PMI EP 100-20 is a high-performance, two-component (2K) epoxy primer formulated with zinc phosphate, designed to provide exceptional corrosion resistance and adhesion across a variety of substrates. Its robust chemical and mechanical properties make it ideal for demanding industrial, commercial, marine, and structural applications.

Size: 5KG Product Code: 142517035 (Grey) Clear

Size: 5KG Product Code: 142523012 (Beige)

Size: 4.5kg Product Code: 175250000 (Tintable)

EP 140-30 Grundierfiller

Enhancing Adhesion and Flexibility.

Mipa EP 140-30 Grundierfiller is a high-quality 2K epoxy primer-filler designed for steel, aluminium, and GRP surfaces. It offers excellent adhesion, corrosion resistance, and smooth flow for a durable, gloss-retentive finish. Suitable for wet-on-wet use or sanding, it's ideal for industrial and commercial vehicle refinishing.

Size: 15KG Product Code: 175080000 Tintable

EP 200-90 Primer

Maximum Corrosion Protection

Mipa EP 200-90 is a 2-component epoxy primer and filler designed to deliver outstanding adhesion and long-term corrosion protection on a wide variety of substrates, including steel, aluminium, galvanized steel, and sanded OEM finishes. Thanks to its high solids content and chemical resistance, it's ideal for both automotive, commercial and industrial applications, especially on bare metal.

Size: 4.5KG Product Code: 175650000 Tintable

2k Acrylfiller EL Primer

Great Filling, Easy Sanding.

Mipa 2K-Acrylfiller EL has very good filling properties and is very easy to sand with excellent adhesion on iron, steel, Aluminium and zinc-coated substrates for use in commercial and car refinishing. It is also suitable to fill partial areas (Spot repair) without sinkage or visible marks in the outer rim.

Size: 1KG Product Code: 229410002

Size: 4KG Product Code: 229440002

Size: 200KG Product Code: 229490002

2K HS Wet on Wet Primer

Skiping Ahead.

Mipa 2K HS Wet-on-Wet Primer is a high-solids, two-component primer designed for direct application to new panels or sanded OEM finishes without the need for sanding between coats. It provides excellent adhesion, smooth flow, and uniform coverage, making it ideal for quick refinishing processes. Suitable for use under solvent- and water-based topcoats, it ensures a consistent, high-quality foundation with minimal preparation time.

Size: 1L Product Code: 227810000

1k Plastic Grin Filler
Enhancing Adhesion and Flexibility.

Mipa 1K Plastic Grin Filler is a single-component, flexible filler specially developed for use on structured plastic surfaces such as bumpers, trims, and exterior mouldings. It is ideal for levelling scratches, pinholes, and minor imperfections without compromising the texture or flexibility of the plastic.

Size:1L Product Code:225210000

1K Rapid Primer
Fast Drying For Spot Repairs

Mipa 1K Rapid Etch Primer is a fast-drying, chromate-free acid primer designed to provide excellent adhesion and corrosion protection on bare metal substrates such as steel, galvanized steel, and aluminium. Its ultra-quick drying properties make it ideal for spot repairs and quick turnaround refinishing jobs.

Size:1L Product Code:224110000

Size:3L Product Code:224130000

Haft Promoter Primer
Enhancing Adhesion and Flexibility.

Mipa's Half Promoter (HAFT) Primer is specially formulated to maximize adhesion, particularly for challenging surfaces. It's an ideal choice for projects requiring a primer that can adapt to various materials while providing a robust base.

Size:1L Product Code:224310000

Size:5L Product Code:224350000

Rostversiegelung
Seals & Stabilizes Rust Surfaces

Mipa Rust Sealer is a high-quality, anti-corrosion primer designed to stabilize and seal rusted surfaces. Ideal for commercial restoration, metal construction, and industrial applications, this product penetrates deeply into rusted areas and transforms residual rust into a stable base for further coating. It provides long-term protection against moisture and oxidation, preventing further rust development. Easy to apply by brush or spray, Mipa Rust Sealer ensures strong adhesion and improves the durability of subsequent paint layers.

Size:750ML Product Code:263010000

1K Glass Primer
Adhesion Promoter For Glass Surfaces

Mipa 1K Glass Primer is a transparent, fast-drying adhesion promoter specially formulated for enhancing paint adhesion on glass and ceramic surfaces. Ideal for automotive and industrial applications, it provides a reliable bonding layer between glass and subsequent coating systems, including 2K paints, clearcoats, and sealants.

Size:1L Product Code:24610000

1K Isolator
Enhancing Elasticity and Resilience.

Mipa 1K Isolator is a fast-drying special primer designed to protect solvent-sensitive old paintworks—such as thermoplastic coatings and alkyd resin-based finishes—from lifting or bleeding when overcoated with solvent-based coating systems. This ochre yellow primer is particularly effective in restoration projects where maintaining the integrity of the original paintwork is crucial.

Size:1L -Product Code:225510000

Fast Filler Primer
Efficiency Meets Quality.

Mipa 1K-Fast-Filler is an acidic 1-component repair filler with excellent filling power for the automotive industry. It can be applied on sanded old 2K-paintworks, shop primers and directly on steel, aluminium and zinc substrates. This product offers time savings thanks to fast drying and sandability.

Size:1L Product Code:224210000
Size:3L Product Code:224230000S

NOTES

MIPA'S 2K PUR-HS COMMERCIAL COATINGS

CRAFTING EXCELLENCE, EMBRACING HERITAGE

The Mipa PUR HS paint system is a unique pure acrylic paint System. This paint system combines economic and cost-saving application with a first-class finish and look.

Pur-HS Toners

Durable, Efficient, and Eco-Friendly Coatings for Truck Body Builders in South Africa.

Mipa PUR HS is a high-solids polyurethane coating designed for truck bodies, offering exceptional coverage, fast drying times, and long-term durability. It provides strong UV and corrosion resistance, making it ideal for South Africa's diverse climates. Suitable for metal, plastic, and wood, it applies easily by spray, brush, or roller and delivers a smooth, customizable finish. Its eco-conscious formula reduces solvent emissions, while fewer required coats and lasting performance offer cost-effective, high-quality protection.

COMMERCIAL HARDENERS

SOLVENT

Take Control of Time.

MIPA Commercail Hardeners represent the pinnacle of chemical engineering, crafted to enhance the durability and performance of industrial coatings. Engineered for compatibility with a wide range of base coats and clear coats, our hardeners ensure exceptional curing properties, delivering robust protection against environmental factors and wear.

Designed for ease of use and optimal performance in industrial settings, MIPA Commercial Hardeners set a new standard in coating technology, providing reliability and longevity for demanding applications across diverse industries.

Empowering Surfaces, Embracing Africa.

MS 10-25/40 Hardener

Optimal for PUR_HS Top Coats.

Fast 2K MS Hardener is ideally suited for use with 2K HS and MS clear coats and HS acrylic fillers. The short curing time makes it ideal for painting small parts or spot repairs.

Size:250ML MS10(Fast) Product Code:237330000

Size:1L MS40(Slow) Product Code:237510000

Size:1L MS10(Fast) Product Code:237310000

Size:1L MS25(Normal) Product Code:237410000

Size:2.5L MS25(Normal) Product Code:237420000

H5-10 Hardener

Optimal for EL Primer

MIPA SE H 5 and H 10 are two-component hardeners used with MIPA products for various applications, including fillers, primers, and coatings. H 5 provides a faster cure time than H 10, making H 5 suitable for partial paintwork and when a quicker turnaround is needed, while H 10 is preferred for complete paintwork where a longer pot life is desirable.

Size:250ML H5(Extra Fast) Product Code:237730000

Size:250ML H10(Fast) Product Code:237830000

Size:1L H5(Extra Fast) Product Code:237710000

Size:500ML H10(Fast) Product Code:237800000

Size:1L H10(Fast) Product Code:237810000

PU933-10 Hardener

Optimal for PUR_HS Top Coats for 24 Hour Curing Time.

Hardener with long open time and very fast curing reaction to coat commercial vehicles with Mipa 2K polyurethane acrylic paints and primers.

Size:2.5L Product Code:017750000

Size: 5L Product Code: 01772000s

EP 950-10 Hardener

Optimal for EP 100 Primer

Mipa EP 950-10 is a fast-reacting hardener for Mipa 2K epoxy primers and topcoats. It accelerates initial drying and curing times, making it particularly suitable for applications in cooler temperatures (10–15°C) or when reduced drying time is desired. Compared to EP 950-25, it reduces drying time by approximately 20%

Size:1L Product Code:17510000

Size:5L Product Code:17500000

EP 905-05 Hardener (Extra Fast)

Optimal for EP 100 Primer

Mipa EP 905-05 is an extra-fast curing hardener specially formulated for use with Mipa 2K epoxy primer systems, particularly in lower temperature environments or when rapid processing is required. It delivers accelerated drying times without compromising adhesion, corrosion resistance, or finish quality.

Size:5L Product Code:018450000

PU 950-25 Hardener

Mipa PU 950-25 is a special hardener for the application of Mipa 2k-PU paint systems on glass surfaces. The perfect glass adhesion is provided when supplementary Mipa 1k- Glasprimer is used as adhesion promoter.

Size:5L Product Code:016110000

2k Accelerator

Mipa 2K Accelerator is a specially formulated additive designed to speed up the drying and curing process of Mipa 2-component (2K) paint systems, including primers, fillers, and topcoats. It helps achieve faster turnaround times in various workshop conditions, especially in cooler temperatures or high humidity environments, without compromising the durability or finish quality.

Size:500ML Product Code:234200000

NOTES

NOTES

[illegible]

CLEARCOATS

Unmatched Gloss Levels.

Mipa clearcoats include a wide range of products for all areas of application. The best gloss retention and surface quality are a matter of course. The CX series features particularly fast drying times and the associated considerable potential for energy savings.

Empowering Surfaces, Embracing Africa.

CS21 Clearcoat

Efficiency Meets Quality.

Mipa 2K-Klarlack CS 21 is a scratch-resistant two-component acrylic clearcoat based on Reflow Technology which is applied without the addition of thinner. Because of its resistance to micro-scratches (caused e.g. by car wash plants) and to chemicals, Mipa 2K-Klarlack CS 21 is particularly suitable for high-quality partial or complete paintworks on cars, motorcycles and commercial vehicles. Mipa 2K-Klarlack CS 21 is especially easy to apply and is perfectly suitable to overcoat waterborne basecoats. VOC-conform.

Size:5L -Product Code:232750001

CC12 2k HS Clearcoat

Enhancing Adhesion and Flexibility.

Mipa 2K-HS-Klarlack CC 12 is a VOC-compliant High-Solid acrylic clearcoat for partial or complete coating of passenger cars and commercial vehicles with particularly brilliant finish and optimum flow on solvent-based or waterbased basecoats. Thanks to its special formulation, Mipa 2K-HS-Klarlack CC 12 generally guarantees improved process reliability compared to standard HS clearcoats.

Size:1L -Product Code:261410000

Size:5L -Product Code:261450000

CCM 2K-HS Matt Clearcoat

Efficiency Meets Quality.

Mipa 2K-HS-Klarlack matt CCM with a gloss between 15 - 20 degrees at a 60°-angle is a VOC-conform High-Solid acrylic clearcoat to create high-quality matt coatings (partial or complete paintwork) on cars. It is also appropriate to adjust the gloss of Mipa 2K-HS-Klarlacke (clearcoats) and of Mipa 2K-HS-Express-Klarlack CX 2. It assures uniformly matted clear coatings on solvent-based and water-based basecoats.

Size:1L -Product Code:233910000

CPE 2K Clearcoat (Gloss 70%)

Efficiency Meets Quality.

Mipa 2K-Klarlack CPE with gloss level 60 - 75 gloss units at a 60° angle is a satin gloss, especially elastic acrylic clearcoat for high-quality complete or partial paintworks in the automotive sector. This clearcoat ensures a uniform satin gloss clear coat on solvent- or water-based basecoats. Mipa 2K-Klarlack CPE is highly resistant to all weather conditions as well as to chemical and mechanical stresses.

Size:1L -Product Code:232210000

CS90 2k HS Clearcoat

Enhancing Adhesion and Flexibility.

Mipa 2K-HS-Klarlack CS 90 is a scratch-resistant two-component HS polyurethane acrylic clearcoat based on Reflow technology. Because of its resistance to micro-scratches (caused e.g. by car wash plants) and to chemicals, Mipa 2KHS-Klarlack CS 90 is particularly suitable for high-quality partial or complete paintworks on cars, motorcycles and commercial vehicles. Mipa 2K-HS-Klarlack CS 90 is especially easy to apply and is perfectly suitable to overcoat waterborne basecoats. VOC-conform.

Size:1L -Product Code:231910000

CC14 HS Clearcoat

Optimal Flow For Partial Or Complete Coating.

High quality High-Solid acrylic clearcoat for partial or complete coating. Brilliant and optimal flow. High vertical stability even at high processing temperatures. Highly resistant to boiling, very suitable for coating of horizontal surfaces optimal polishing properties. Highest resistance.

SIZES:1L Product Code: 262310000
SIZES:5L Product Code: 262350000

CX4 Express Clear

Efficiency Meets Quality.

CX4 Express Clear is a fast-drying 2K clear coat designed for rapid repairs and high-efficiency refinishing. It offers excellent gloss, smooth flow, and easy polishability with minimal bake or air-dry time. Ideal for spot and panel repairs, CX4 delivers a durable, high-quality finish in a fraction of the usual time.

Size:1LT -Product Code:260420000

CS44 Express Clear HS

Efficiency Meets Quality.

CS44 Express Clear HS is a high-solids, fast-curing 2K clear coat formulated for efficient spot and panel repairs. It delivers excellent gloss, UV resistance, and a smooth finish with minimal drying time. Suitable for air-dry or low-bake applications, it ensures quick turnaround without compromising durability or appearance.

Size:1LT -Product Code:232110000

COMBO PACK

CS21 Clearcoat & Hardener

Efficiency Meets Quality.

Mipa 2K-Klarlack CS 21 is a scratch-resistant two-component acrylic clearcoat based on Reflow Technology which is applied without the addition of thinner. Because of its resistance to micro-scratches (caused e.g. by car wash plants) and to chemicals, Mipa 2K-Klarlack CS 21 is particularly suitable for high-quality partial or complete paintworks on cars, motorcycles and commercial vehicles. Mipa 2K-Klarlack CS 21 is especially easy to apply and is perfectly suitable to overcoat waterborne basecoats. VOC-conform.

Size:1.5L (Fast) -Product Code:232720003L Size:1.5L (Normal) -Product Code:232720001L

C310 & D10 2K HS Clearcoat & Hardener

Efficiency Meets Quality.

C310 & D10 2K HS Clearcoat is a high-solids, two-component acrylic clearcoat developed for professional refinishing, delivering outstanding gloss and long-term durability. Engineered for ease of application and high surface hardness, it provides excellent resistance to environmental influences, chemicals, and micro-scratches—making it ideal for full or partial repairs on cars, motorcycles, and commercial vehicles. Thanks to its optimized flow characteristics and compatibility with waterborne basecoats, C310 & D10 2K HS Clearcoat ensures a premium finish with minimal effort. VOC-compliant.

Size:900ML -Product Code:239426061

REDUCERS

SOLVENT

Refining with Dignity.

In the alchemy of paint perfection, Mipa's Reducers play a crucial role. These reducers are meticulously formulated to ensure that every paint mixture achieves the ideal consistency and performance. They are the unsung heroes in achieving the perfect balance between flow and finish. Whether thinning automotive and commercial paints for a smoother application or adjusting industrial coatings for optimal results, our reducers are essential for professionals who demand precision in every drop.

Empowering Surfaces, Embracing Africa.

2K Thinner

Balancing Consistency and Performance.

Mipa 2K-Verdünnung normal V 25 is a mixture of organic solvent to thin Mipa 2K primers 2K topcoats and 2K cleacoats. For further information on use and recommended dosage, please refer to the respective technical data sheet of the basic products.

Size:1L 35(Fast) Product Code:271110000

Size:5L 25(Normal) Product Code:271015000

EP Reducer

Enhancing Adhesion and Flexibility.

Mipa EP Reducer is a high-quality 2-component epoxy thinner used with Mipa epoxy primers and fillers. It ensures optimal application viscosity and flow, contributing to a smooth and even finish .

Size:5L Product Code:272150000

UN21

Efficiency Meets Quality.

Mipa UN21 is a high-quality, highly volatile solvent suitable for thinning, cleaning, and dissolving synthetic resin paints and 1-component paints. It is perfectly suitable as a spray thinner, offering excellent flow and gloss properties for the thinned paint .

Size:5L Product Code:698120004

Mipa Basecoat Thinner

Enhancing the Art of Layering.

Mipa's Basecoat Thinner is specifically designed to augment the application and finish of basecoat paints. This thinner is a vital tool for achieving the best possible results in both automotive and industrial basecoat applications.

Size:1L -Product Code:2730100000
Size:5L -Product Code:273050000

2K Blending Thinners

The Essential Surface Prep Solution.

Mipa 2K Blending Thinners are specially formulated solvents designed to facilitate smooth and flawless blending of 2-component (2K) paint systems during automotive refinishing. They help achieve perfect transitions between new paint and existing surfaces, ensuring an invisible repair with professional finish quality.

Size:1L Product Code:234110000

PROTECTORS

The Finishing Touches that Matter.

Explore our Protector, a versatile product available in multiple colours that can be tinted to match specific shades. Protector not only enhances the aesthetic appeal of surfaces but also provides durable protection against environmental factors, ensuring longevity and resilience. Whether you're looking to add a vibrant splash of colour or require a subtle tint that blends seamlessly with your project, Protector delivers exceptional performance and versatility.

Empowering Surfaces, Embracing Africa.

2K-PU Truck Bed Liner

Enhancing Adhesion and Flexibility.

Mipa Protector is a two-component polyurethane-acrylic coating designed to provide a durable, scratch-resistant finish for high-impact surfaces. Ideal for applications such as pickup truck beds, trailers, off-road vehicles, and commercial equipment, this coating offers exceptional mechanical and chemical resistance. Its textured, matte black finish not only enhances the appearance of surfaces but also provides anti-slip properties, making it suitable for areas requiring additional traction.

- Size:750ML -Product Code:204110001 Black (Must use H5/H10 Hardener)
- Size:750ML -Product Code:204110002 Tintable (Must use H5/H10 Hardener)
- Size:250ML H5 Hardener (Extra Fast) -Product Code: 237730000
- Size:250ML H10 Hardener (Fast) -Product Code: 237830000

2K-PU Truck Bed Liner

Enhancing Adhesion and Flexibility.

Mipa Protector is a two-component polyurethane-acrylic coating designed to provide a durable, scratch-resistant finish for high-impact surfaces. Ideal for applications such as pickup truck beds, trailers, off-road vehicles, and commercial equipment, this coating offers exceptional mechanical and chemical resistance. Its textured, matte black finish not only enhances the appearance of surfaces but also provides anti-slip properties, making it suitable for areas requiring additional traction.

- Size:3L -Product Code: 204130001 (Must use H5/H10 Hardener)
- Size:1L H5 Hardener (Extra Fast) -Product Code: 237710000
- Size:1L H10 Hardener (Fast) -Product Code: 2377810000

Stone Chip

The Essential Surface Prep Solution.

Mipa Stone Chip Protection is a high-performance, overcoatable coating designed to safeguard vehicle underbodies, wheel arches, sills, and lower body panels from stone chips, corrosion, de-icing salts, and mechanical wear. Its permanently elastic formulation ensures long-term flexibility, making it ideal for both automotive refinishing and industrial applications.

- Size:750ML -Product Code:256210000 Black
- Size:750ML -Product Code:256220000 Grey
- Size:750ML -Product Code:256230000 White

2K-PU Truck Bed Liner (Aerosol)

Enhancing Adhesion and Flexibility.

Mipa Protector 2K Spray Black is a robust two-component polyurethane-acrylic aerosol coating engineered for high-impact protection on demanding surfaces. Ideal for applications such as pickup truck beds, off-road vehicles, trailers, and other commercial equipment, this spray delivers a textured, satin-matte black finish that combines aesthetic appeal with functional durability.

- Size:400ML -Product Code:212950000

StoneChip Protector Gun

This rubber protective spray gun is a specialized tool designed to apply a thick, flexible, and durable rubberized coating to the load bin (rear cargo area) of a bakkie. Once sprayed, it forms a tough, textured layer that adheres securely to the metal surface, providing long-lasting protection against everyday wear, corrosion, and impact damage. Ideal for bakkies used in construction, agriculture, deliveries, and other demanding environments, this coating effectively shields the surface from scratches, dents, rust, and chemical spills, helping to preserve the vehicle's condition and extend its working life.

- Product Code: STGUN01

AEROSOLS

Developed with Custom Nozzles.

As one of the leading suppliers of aerosols in the professional sector, MIPA offers spray cans for a wide range of applications. Mipa aerosols are characterised above all by their easy handling. Special spray systems allow very precise application to a wide variety of surfaces.

Empowering Surfaces, Embracing Africa.

Universal Prefilled
Enhancing Adhesion and Flexibility.

The Mipa Universal Prefilled Aerosol is a high-quality, pre-charged spray can designed for automotive refinishing and general-purpose applications. Pre-filled with a mixture of propellant and solvents, it is suitable for use with various paint types, including alkyd, synthetic, nitro-cellulose, and acrylic-based paints. This aerosol is ideal for professionals and DIY enthusiasts seeking a reliable and versatile spray solution.

Size:400ML -Product Code:212000000

2K Löser Spray
Accelerating Excellence.

The Mipa 2K-HS-Löser Spray is a specialized solvent-based aerosol designed to seamlessly blend overspray edges and transition zones during automotive refinishing. This high-performance product is essential for achieving flawless spot repairs, ensuring that the boundary between old and new paintwork is virtually invisible.

Size:400ML -Product Code:212540000

2K Ground Filler
Efficiency Meets Quality.

The Mipa 2K-EP-Grundierfiller Spray is a professional-grade, two-component (2K) epoxy primer-filler designed to provide superior adhesion, corrosion protection, and a smooth surface for automotive refinishing. This product is ideal for use on various substrates, including steel, aluminum, zinc, and existing paint layers, ensuring a reliable base for subsequent topcoats.

Size:400ML -Product Code:213210000

Rust Protector Primer
Enhancing Adhesion and Flexibility.

The Mipa Winner Rust Protection Primer is a high-quality, one-component (1K) primer designed to provide effective corrosion protection for metal surfaces. This product is ideal for spot repairs and small to medium-sized areas, offering excellent adhesion and durability.

Size:400ML -Product Code:216011100

2K Prefill Can
Efficiency Meets Quality.

The Mipa 2K Prefilled Aerosol is a high-quality, two-component (2K) spray can designed for automotive refinishing. It comes pre-filled with a mixture of propellant and solvents, and includes an integrated hardener that can be activated before use, ensuring a fresh and durable finish every time.

Size:400ML -Product Code:212030000

Size:250ML -Product Code:212060000

Plastic Anti Static Cleaner

Enhancing Adhesion and Flexibility.

The Mipa Antistatic Plastic Cleaner is a high-performance cleaning agent formulated specifically for all common plastic surfaces. This product effectively eliminates electrostatic charges and prevents their regeneration, ensuring a dust-free environment during painting and refinishing processes.

Size:400ML -Product Code:212550000

1K Epoxy Grey

Accelerating Excellence.

The Mipa 1K Epoxy Primer Grey is a high-performance, chromate-free, one-component (1K) epoxy resin-based primer designed for automotive refinishing and industrial applications. This primer offers excellent corrosion protection, superior adhesion, and exceptional filling properties, making it ideal for preparing metal surfaces before topcoating.

Size:400ML -Product Code:213250001

Miparox Anti Rust Spray

Efficiency Meets Quality.

Mipa Miparox Anti-Rust Spray is a high-performance, epoxy-resin-based anti-corrosion protective coating designed to combat rust and provide long-term protection for metal surfaces. This product forms a dark grey to black protective layer that not only neutralizes existing rust but also serves as an effective primer for subsequent coatings.

Size:300ML -Product Code:682010000

Rapid Primer

Efficiency Meets Quality.

The Mipa Rapid Primer is a fast-drying, one-component adhesion primer designed to provide active corrosion protection for metal surfaces. Its red-brown color ensures excellent coverage and is suitable for various substrates, including steel, iron, galvanized surfaces, and aluminum. This primer is particularly effective for minor repairs and areas that have been partially sanded to bare metal.

Size:400ML -Product Code:213010001A

Universal Pre Spray

Enhancing Adhesion and Flexibility.

The Mipa Universal Prefilled Spray is a versatile aerosol can designed for custom filling with a variety of 1K paint systems. This pre-charged can is suitable for all common alkyd, synthetic, nitro-cellulose, and acrylic-based paints, making it an ideal choice for professionals and DIY enthusiasts seeking flexibility in their painting projects.

Size:400ML -Product Code:213310000

PMI Prefill Can

Efficiency Meets Quality.

The Mipa PMI Prefilled Spray is a versatile aerosol can designed for custom filling with a variety of 1K paint systems. This pre-charged can is suitable for all common alkyd, synthetic, nitro-cellulose, and acrylic-based paints, making it an ideal choice for professionals and DIY enthusiasts seeking flexibility in their painting projects.

Size:400ML -Product Code:212080000

1K Fast Filler

Enhancing Adhesion and Flexibility.

The Mipa 1K Fast Filler Spray is a high-performance, chromate-free one-component filler designed for automotive refinishing. It offers excellent filling power, making it ideal for spot repairs and minor surface imperfections.

Size:400ML -Product Code:213037040

Acrylic Lacquer Spray

Efficiency Meets Quality.

The Mipa 1K Acrylic Lacquer Spray is a high-quality, single-component aerosol paint designed for professional and DIY applications. This versatile spray provides a durable, high-gloss finish suitable for a variety of substrates, including metal, wood, and certain plastics.

Size:400ML -Product Code:214500001

Silicone Remover

Accelerating Excellence.

Mipa Silicone Remover is a high-performance, CHC-free cleaning and degreasing agent designed for thorough surface preparation prior to painting. It effectively removes silicone, grease, oil, wax, tar, and other contaminants from metallic and polymeric materials, ensuring optimal paint adhesion and a flawless finish.

Size:400ML -Product Code:212520000

1K Etch Filler

Efficiency Meets Quality.

The Mipa 1K Etch Filler is a versatile, single-component primer that combines excellent adhesion with effective corrosion protection. Designed for use on various metal substrates, including steel, aluminium, and galvanized surfaces, it serves as an ideal foundation for subsequent paint applications.

Size:400ML -Product Code:213040001

Clear Spray

Enhancing Adhesion and Flexibility.

The Mipa 1K Clear Spray is a single-component, high-gloss clearcoat that provides a durable and transparent finish. It's ideal for enhancing and protecting painted surfaces, offering excellent clarity and UV resistance.

Size:400ML -Product Code:215010020

Bumper Paint Spray

Enhancing Adhesion and Flexibility.

Mipa Bumper Paint Spray is a high-quality, ready-to-use aerosol coating specifically designed for the refinishing and restoration of plastic bumpers and exterior trims. It offers excellent adhesion, flexibility, and a durable, textured OEM-style finish that closely matches original plastic part appearances.

Size:400ML -Product Code:212210001

Spray Putty Grey

Enhancing Adhesion and Flexibility.

Mipa Spray Putty Grey is a high-build, aerosol-applied 1K polyester spray putty designed to fill fine scratches, sanding marks, and minor surface imperfections on primed or filled substrates. It offers excellent sanding properties and provides a smooth, uniform surface prior to topcoat application.

Size:400ML -Product Code:213660000

2k Protector Black

Accelerating Excellence.

Mipa 2K Protector Black is a high-build, two-component polyurethane-based coating designed for extreme surface protection in automotive and industrial applications. With a rugged, textured finish, it provides outstanding resistance to impact, abrasion, chemicals, and weather, making it ideal for off-road vehicles, pickups, utility vans, and more.

Size:400ML -Product Code:212950000

NOTES

This image shows a single page from a notebook or ledger. It features approximately 20 evenly spaced, thin grey horizontal lines running across its width. The background is plain white, and there are no margins, text, or other markings present.
