

SLASH YOUR BILLS WITH 6 ENERGY UPGRADES

Rewiring
Aotearoa 

Save thousands of \$ every year

On average New Zealand homes with gas appliances and petrol vehicles pay around \$7,600 more per year on energy bills. By choosing electric equivalents and powering them with a combination of rooftop solar, home batteries and New Zealand's highly renewable grid, **you could save net \$3,000** per year including upfront costs.

WHEN YOU SWITCH YOU SAVE

HEAT PUMP

15 yr savings **\$15k* / \$19.2k⁺**

Install cost \$3k - \$10k

Emissions saved High

*upgrade from gas / ⁺upgrade from LPG

HOT WATER HEAT PUMP

15 yr savings **\$10.3k* / \$12.5k⁺**

Install cost \$6k - \$10k

Emissions saved High

*upgrade from gas / ⁺upgrade from LPG

ELECTRIC VEHICLE

15 yr savings **\$24k**

Cost \$40k - \$70k (new)

Emissions saved Very high

Medium SUV, grid-charged

INDUCTION COOKTOP

15 yr savings **\$800* / \$2k⁺**

Install cost \$1k - \$3k

Emissions saved Low

*upgrade from gas / ⁺upgrade from LPG

ROOFTOP SOLAR

30 yr savings **\$60k**

Install cost \$21.9k for 9kW*

Emissions saved Moderate

*includes \$4.4k inverter replacement

HOME BATTERIES

Adding home batteries to your solar setup increases your energy independence, creates resilience and locks in lower energy costs into the future.

MY ELECTRIFICATION PLAN

I'll electrify in this order...

Number each box

- ☐ Solar and batteries
- ☐ Electric vehicle
- ☐ Heat pump
- ☐ Hot water heat pump
- ☐ Induction cooking

And I'll convince these
people to electrify...

- 1 _____
- 2 _____
- 3 _____
- 4 _____
- 5 _____

Driving

I'm likely replacing my car in _____ years. That means I'll upgrade to an electric vehicle in the year _____

Water heating

My water heater is _____ years old. To save over \$10k, I'll replace it with a hot water heat pump in the year _____

Cooking

I can improve the respiratory health of my family and make cooking cleaner and easier with an induction cooktop.

We'll be renovating in _____ years; I can do it then, or maybe we gift it to ourselves this Christmas.

Space heating

My space heaters are _____ years old. To save over \$15k, I will upgrade to a heat pump in the year _____

Solar & Batteries

I know I could be saving immediately on my bills. I will buy rooftop solar and perhaps a battery as well in the year _____
