

1993 USAC TQ MIDGET SEASON

Consistency Was the Key for Ercse in 1993

"My dad worked on Emerson Fittipaldi's pit crew at Indy in 1984, so after Emmo won at Indy, I really wanted to win the title and join him at the Awards Dinner in January," said J.J. Ercse, USAC's 1993 Copenhagen/Skoal TQ Midget champion.

J.J. drove his first TQ race in 1989 after racing go-karts for most of the year at Ascot Park in Gardena, California. He had started in quarter midgets at age six, and nine years later, after placing second in the Pomona Valley Quarter Midget Racing Association standings, took a couple years off to concentrate on his schooling. He returned with determination to become a champion.

After a brief learning curve in 1990, he teamed up with car entrants Don and Nancy Steinhelper in 1991. He just missed the top-20 in the final standings, then climbed to ninth in the 1992 points, scoring his first feature victory in a 10-year-old Stewart coil-over car at Lake Perris Fairgrounds near Riverside, California.

"I set a high goal this year," Ercse said. "I wanted the title, and after back-to-back feature wins at Carson City and Ventura in June, things looked pretty good."

He ranked third at that point, then scored another Ventura win in August to move into the point lead.

"I figured consistency would put us in the hunt the rest of the way and the fourth place finish at Ventura virtually clinched it," he recalled. "I have to thank Tony Stewart (who qualified the car) and Carl Nigh (the owner) for letting me drive for them after my car quit."

He was referring to his drive from the back of the pack to fourth in the main event.

"My dad, Fred, served as my crew chief and got plenty of mechanical help from my uncle, John, and Keith Shimizu. And I offer thanks to Les Dierks, who bought the chassis for us, plus sponsors McCreary Race Tires, Sander Engineering, Hydraulic Equipment Service, Simpson, Acraton Refrigeration, Auto-B-Craft, Collision Center, Decore Plating and Artistic Impressions. SC Performance built my Honda 750 motors."
