

Consent to the Use of PlaynVoice

Dear Patient,

I use PlaynVoice, a software for documenting our sessions. For this, I need your consent.

Why I use PlaynVoice

With PlaynVoice, I don't need to take notes during our session and can focus fully on you and our conversation. The software can help me record important content completely and save me time that I can reinvest in your treatment.

How it works

Our conversation is recorded and converted into text. From this, a draft of my note is created, which I review and adjust. Responsibility for the documentation remains with me.

How your data is protected

- The recording is deleted after it has been converted into text, names are removed, and notes are stored at PlaynVoice only temporarily (30 days by default).
- All data is encrypted, processed exclusively in Switzerland, and is neither used for AI training nor shared with third parties.
- Like me, PlaynVoice is bound by professional secrecy (Switzerland: Art. 321 StGB, Germany: § 203 StGB), is ISO 27001 certified, and complies with the Swiss Federal Act on Data Protection (FADP) and the GDPR.

Consent

I have been informed about the use of PlaynVoice and agree that my therapist may use PlaynVoice in my treatment. My consent is voluntary: declining has no effect on my treatment. I can withdraw my consent at any time or ask that individual sessions not be recorded.
