Yellow Lotus Flowers in Conan Exiles can be found throughout the map; however, for mass farming, players should focus on Telith's island in the eastern highlands. The other types of lotus flowers are scattered across various locations, and using a sickle won't work with Crimson Lotuses. Here is where you can find different types of Lotus Flowers: \* \*\*Golden Lotus\*\*: Usually found near buildings or stairs in the Volcano. \* \*\*Crimson Lotus\*\*: Surrounds the mounds of the dead; be aware that your sickle won't work here. \* \*\*Frost Lotus\*\*: Found in the snowy north, particularly around the Black Keep. \* \*\*Grey Lotus\*\*: Only seen in the arena, found in chests along with seeds. \* \*\*Purple Lotus\*\*: Mainly discovered in the jungle's northern part near spiders. \* \*\*Black Lotus\*\*: Located in the black garden of the swamp; a sandstorm mask will come in handy for this (just west of the Witch Queen). The Lotus Flower holds significant meaning, representing insight and life and death. The various types found in Conan Exiles are covered here. The Yellow Lotus Flowers are about to bloom! To gather these versatile flowers, head to The Arena (I6) across the river from the ruin's entrance or Inlet of the Hook (M7), where you can find more along the riverbank. Before farming, make sure you have the right harvesting tools, like a sickle or Word of Power: Mass Cull, to maximize your resource gain. You can also unlock Efficient or Careful perks to boost your flower and seed yields. You can use Yellow Lotus Flowers in various ways, including: \* Processing flowers into powder for brewing potions and elixirs \* Planting seeds in a Planter to grow Purple Lotus Flowers \* Mixing with other ingredients to create Fodders for pets \* Crafting potions like Potion of Bestial Memory (resets Attributes), Potion of Natural Learning (removes Knowledge), or the Yellow Lotus Potion \* Using in cooking consumable items, such as food and brews, for humans and animals \* Burning flowers or powder in the Lotus Burner Guardian Torso golem part to produce a unique status effect that reduces enemy aggression That's it!
