

Cyber Essentials

What is it?

Cyber Essentials is a government-backed, industry supported scheme to help organisations protect themselves against common cyber attacks. It is an independently verified self-assessment tool.

How to Complete it

Organisations assess themselves against five basic security controls and a qualified assessor verifies the information provided.

What are the benefits?

92% fewer insurance claims are made by organisations with these controls in place.
88% believe Cyber Essentials has improved their understanding of cyber security risks.
89% of organisations would recommend certifying to other organisations like theirs.

The number of contracts requiring Cyber Essentials is growing.

Certification includes automatic cyber liability insurance.

How Much Does it Cost?

There is a cost to complete the full certification, which depends on the size of an organisation. However, the self-assessment questions can be accessed in advance for free, so organisations can still review their current position and processes and see where there might be room for improvement.
