

Charity Digital

Charity Digital offer a wide range of support which reflects the diverse uses for digital technology in the charity sector today.

Led by their Theory of Change, they offer the following services for free:

Digital strategy and skills training

Providing guidance and resources on digital best practice

Convening and hosting events

Translating between sectors and supporting digital collaboration

Influencing work to demonstrate the benefits of digital investment

Increasing access to software through their [exchange programme](#)

Charity Digital Exchange

This exchange platform provides charities access to free and discounted software and hardware offers, training, and courses.

Cyber Security Support

Charity Digital have a dedicated cyber security section on their website, which is frequently updated with articles, resources and quizzes, to educate and empower charities to better defend themselves against cyber attacks.

They also have a regular 'Risk Newsletter' where they share the latest information.

Charity Digital Academy

They also offer a range of training courses, usually three hours long, which aim to enhance soft skills and hard skills, boost organisations' knowledge of finance and artificial intelligence, and supercharge their digital capabilities.
