These include: * Failure to follow proper maintenance procedures, such as using the correct grade and amount of engine oil or keeping the deck clear of flammable debris. * Engine problems caused by contaminated or oxidized fuel, which should be used within 30 days of purchase. * Normal wear and tear on exterior finishes or product label replacement. However, warranty coverage is void if the tractor is used for commercial or rental purposes. The warranty only applies while the product is within the United States, and it grants you specific legal rights that may vary from state to state.
