Project Aims and Objectives

Project Title :

- Installation of Community Hand Pump

Project Aim:

- Safe & Clean Drinking water for everyone

Project Objectives:

- Increased access to safe drinking water for everyone
- Elimination of microbial contamination by deep bores and safe areas
- Improved sanitation and hygiene practices to raise life standards
- Reduction of water source contamination by making available fresh and pure drinking water
- Prevention of waterborne disease outbreaks by providing safe and clean drinking water
- Protection of vulnerable populations in remote areas where there is a limited clean water supply
- Education on safe water practices
- Addressing environmental factors and mitigation of environmental pollution
- Improved public health by reducing waterborne diseases
- Community empowerment and involvement in water management
- Sustainability through local capacity building for maintenance
- Cost-effectiveness compared to more complex water supply infrastructure
- Social and economic benefits, such as improved productivity and education opportunities
- Disaster resilience by providing a reliable water source during emergencies
