## MONTESSORI PLAYROOMS for parents and children 1.5-3 years-old

*Would you like to get to know Montessori up close and draw inspiration for joyful learning and peaceful parenting? Would you like to experience with your children what Montessori is and what it brings, to be together in their happiness of experimenting and discovering and to learn how to bring it all home?*

In our Friday playrooms, you will have a **wonderful time together** with your child, try various **Montessori materials and activities**, and children will share with you their joy and wonder. You will get **inspiration for playing together at home and outside** and for **peacefully resolving various behaviours** that children sometimes test us with. The playrooms for parents and children together are about **playing**, as well as **learning about Montessori principles**. They are a **safe and creative space for sharing, reflecting, and consulting parenting and bringing children up with respect, love, and freedom, yet needed boundaries**. The playrooms are led by our experienced Montessori teachers in English and Czech who look forward to welcome you.

## MINI PRESCHOOL for children from 1.5 to 3 years-old

*Do you feel that your child starts needing peers around and may be ready for his or her next step toward growth, independence, and self-confidence? Are you considering preschools and wondering if there is a safe, loving place where he or she will develop and where you can let him or her go with trust?*

## COME VISIT OUR TODDLER CLASS or try our Friday playrooms with your child.

For 16 years now, our Montessori preschool also has a Toddler classroom. In a safe and beautiful environment of a small group of **at most ten children** and under the kind, patient, and inspiring guidance of **two experienced Montessori teachers working together**, one **Czech** and one **English-speaking**, the children from 1.5 to 3 years of age **freely explore the world around them and their own possibilities, needs and interests**. In the sensitive period of their first calling for self-discovery and confidence, which is important for the development of their personality, their relationship to learning and, above all, their relationship to themselves and to others, **they develop independence and first social skills**. Together, like in a family with many siblings, **they learn to take care of themselves and their environment**. They care for plants and animals, clean, bake cookies. They create, develop their speech, and perform their first little science experiments. And **each time they succeed**, their **joy, interest, and self-confidence** grow.

“Many thanks for the Friday workshops. Petra and Rosario opened my eyes in many ways. Thanks to their kindness, professionalism, and enthusiasm, we always feel great and look forward to next.”
