

Your Occupational Health Partner.

Our services span the full scope of occupational health – from pre-employment and annual physicals to at-work injury evaluations and treatments. Could our clinic benefit your workforce?

Let's work together.

We can work with you to customize our program and credentialing based on the needs of your organization and employees.

Contact Derek Gibson at Derek.Gibson@memorialohio.com or (937) 578-2256 for more information.

A one-stop-shop for culturally concentrated care.

Specifically for our community's Japanese population, our Japanese Clinic provides a path to primary care services for acute and chronic conditions, including follow-up care – typically following annual executive physicals.

We have experience working with large organizations with substantial Japanese employee workforces, providing accessibility and the elimination of language and other cultural barriers.

Memorial Family Medicine | Japanese Clinic Highlights:

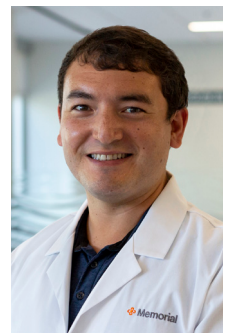

- A provider who can communicate with Japanese-speaking patients and understand their culture
- Comprehensive exams, blood tests, imaging, and additional testing
- Annual vaccinations, including some travel vaccines
- Hassle-free follow up appointment scheduling done by the provider
- Referrals to specialists as needed
