

Performance unplugged

Embrace the next generation of enterprise computing with Computacenter and Qualcomm Technologies, Inc.

High performance devices to match workforce needs

Today's workforce needs high performance technologies to support AI-driven work and hybrid workstyles. Computacenter and Qualcomm Technologies work together to offer organisations next-generation devices, underpinned by comprehensive workplace expertise and services.

Supporting AI-driven work and hybrid workstyles

The pace of change in the workplace continues to accelerate. As employees adopt AI for a growing range of tasks, they need devices that deliver fast performance, all-day battery life and seamless mobility, wherever they work¹.

1. Battery life varies significantly with device, settings, usage, and other factors.

Performance-ready technology

Computacenter and Qualcomm Technologies help equip organisations with technologies that meet user requirements for high performance and offer incredible battery life.

Devices powered by Snapdragon® processors are optimised for AI-driven workflows, compatible with Windows ecosystems and support modern collaboration tools like Microsoft Copilot.

Devices powered by Snapdragon processors deliver outstanding performance and offer up to 22 hours of battery life from a single charge¹, so users stay productive without compromise. With optimised CPU, GPU and NPU engines working together, power is designated where and when it's needed to optimise performance.

1. Battery life varies significantly with device, settings, usage, and other factors.

Simplifying management, security, sustainability and cost control

Combining devices powered by Snapdragon with Computacenter's services helps organisations meet IT and business requirements around ease of management, security, sustainability and cost control.

Computacenter makes it easier to adopt the next generation of devices with expert advice, streamlined sourcing, rapid deployment, lifecycle management and proactive support services.

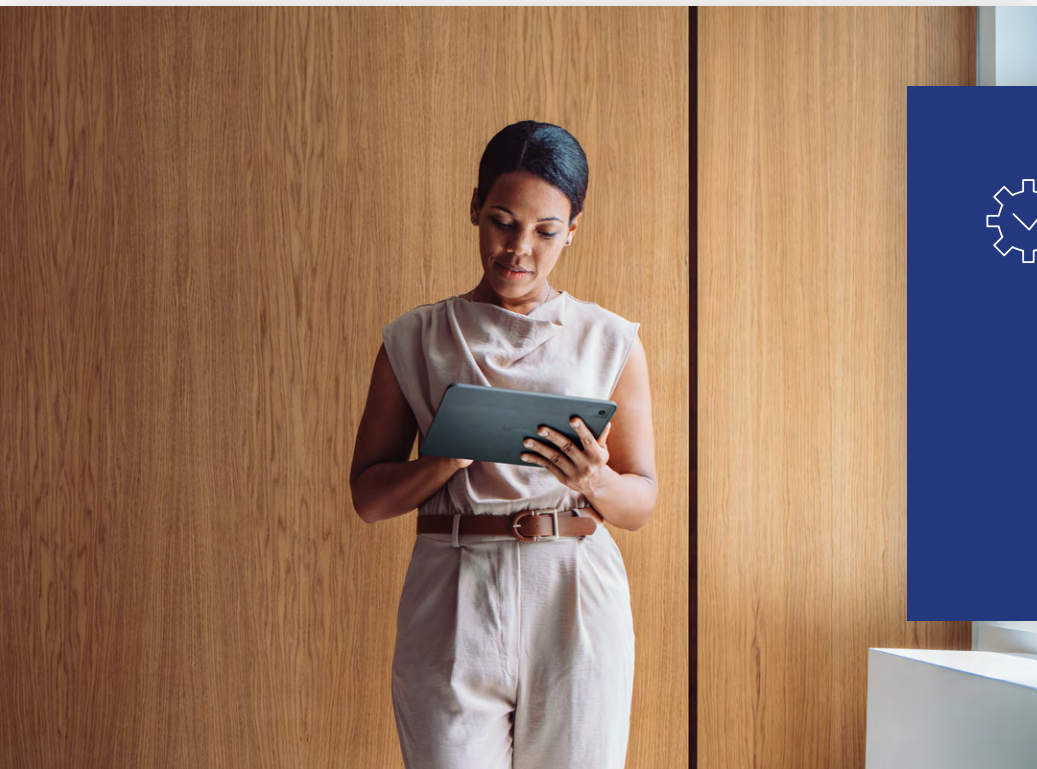

Simplified management: Computacenter's workplace services include deployment, configuration and lifecycle management to relieve the burden on internal IT teams. With built-in application compatibility and easy onboarding for Windows and AI applications, devices powered by Snapdragon are straightforward to manage and support.

Enhanced security: Enterprise-grade, on-device security helps safeguard users and their data.

Optimised cost control: Simplified managed and reduced energy consumption contribute to greater cost control.

Keeping the workforce productive, however and wherever they work

With Computacenter and Qualcomm Technologies, organisations can empower the workforce with powerful, long-lasting devices, so they can stay productive and connected, however and wherever they work.
