

Turn Your Historical Data into Actionable Insights

BlueMarvel Snapshot transforms your historical operational data into **instant, AI-powered insights** — with no IT infrastructure investment.

Comprehensive Report with Executive Rollup

With each data upload, you receive an AI-powered report detailing key areas of focus, priority actions, and critical operational instances benchmarked against industry standards.

Interactive Dashboard for Deeper Insights

Each report is linked to the **BlueMarvel Dashboard**, allowing you to drill down into trends, historical data, and specific timeframes for a clearer understanding of operational performance.

Visual Performance Benchmarking

Compare sites, assets, and fleets with our **Enterprise View**, helping you heat map and pinpoint inefficiencies and operational challenges.

Automated, Data-Driven Decision Support

No more manual analysis — our AI structures and analyzes your data, delivering actionable recommendations to improve efficiency, reduce operator workload, and overall equipment effectiveness (OEE).

- ✓ Upload 3–12 months of data
- ✓ Identify inefficiencies & trends
- ✓ Get automated executive reports
- ✓ Benchmark performance across fleets & sites

BLUEMARVEL

Your First Step to Digital Enablement — No Complex Integrations Required.

“Snapshot showed us exactly where the problems were — too much alarm noise, too many manual workarounds. We didn’t have to rip out any systems or wait on IT. We had the answers right in front of us. Even our morning meetings got tighter — we could see what needed attention right away and set our priorities without the guesswork.”

— *Plant Operations Manager*

“Snapshot gave us a clear, visual view of performance across our sites. The ability to benchmark assets and pinpoint inefficiencies helped us focus our resources where they’d have the biggest impact. It brought alignment between leadership and operations and gave us the confidence to move forward with the right investments.”

— *VP, Operations Strategy*

Go Beyond Snapshot and Monitor in Real-Time with BlueMarvel Live

BlueMarvel Snapshot helps you analyze historical data and prioritize improvements — but what if you could take action in real-time?

Live OT Data Integration

Connect operational data in real time for instant, AI-powered insights.

Enterprise-Wide Monitoring

Track performance across fleets and sites with automated alerts and real-time dashboards.

Unified Plant Perspective

Reveal inefficiencies across functions — from operations to maintenance — with a single, integrated view.

From insights to action — move beyond analysis and unlock real-time intelligence with **BlueMarvel Live**.
