Climate Impact Report

2025

Carbonfuture

A Note on Our Numbers

In 2025, Carbonfuture's total carbon emissions footprint came to 411 tCO_2e, a 3.20% decrease compared to 2024. Any emissions reduction is a cause for celebration, but the context makes it more meaningful: 2025 was also a year of organizational growth, with our team growing by almost 20%, from fewer than 39 FTE to over 46 FTE by year's end. As a result, our carbon emissions per FTE declined by 18% year on year.

This year's report is also more precise. Working with our third-party verification partner RyeStrategy for the second consecutive year, we have built better internal tracking and reporting systems to gain a clearer picture of where our emissions actually come from.

We saw a reduction in Business Travel Emissions, as improved tracking and enforcement of company expense policies came into full force in 2025. Carbonfuture always prioritizes rail vs. air travel, local mass transit vs. travel in an individual car, and vegetarian meal options.

We also saw a reduction in contracted Business Services as we brought several processes (e.g., legal, compliance, financial) in-house during the past year. Managing these directly allows us to control the emissions associated with office space, software, and travel.

One methodology note: Software Services now appears as its own category for the first time, alongside a corresponding drop in what was previously reported under Servers. This reflects better data, not new emissions.

As in previous years, we are compensating our full footprint with a portfolio of durable carbon removal credits. Reducing our emissions remains our priority. Carbon removal is how we address what we cannot yet eliminate, responsibly, and in support of the supplier partners building this market alongside us. Using our own infrastructure to do so is also how we stay honest about what we are building and why it matters.

We continue to pursue new opportunities to reduce our carbon footprint. One area of focus will be better understanding and reducing the carbon emissions impact from the use of AI software tools.

HANNES JUNGINGER-GESTRICH
CEO & Co-Founder, Carbonfuture

Carbonfuture | Carbon Footprint

2025 Emissions Overview

Total Emissions 410.99 MT

Emissions Change ↓ 3.20%

Scope Summary

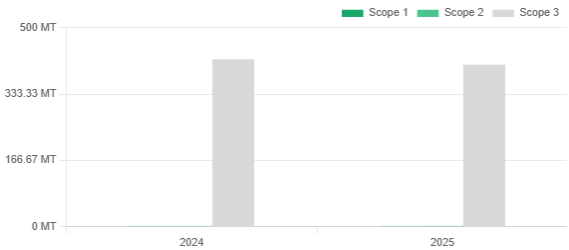

Scope 1	Direct Emissions	1.69 MT
Scope 2	Indirect Emissions	2.23 MT
Scope 3	Value Chain Emissions	407.08 MT

Highest Emitting Activities

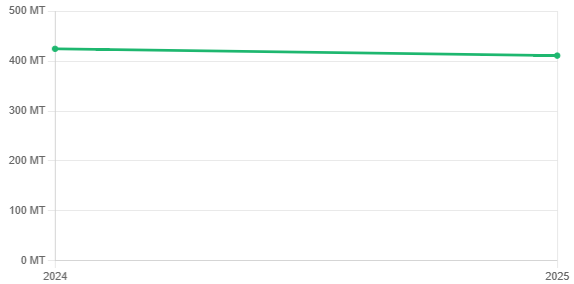

Business Services	124.38 MT
Air Travel Emissions	80.31 MT
Other Purchased Goods & Services	47.30 MT
Software Services	35.99 MT
Financial Services	26.53 MT

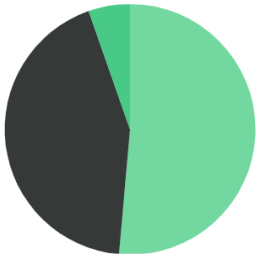

Emissions per Scope

YOY Emissions

Scope 1 and 2 Emissions

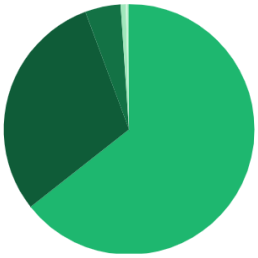

Scope 1

Facility Refrigerants & Propellants	1.69 MT
Stationary Combustion (if owned)	0.00 MT

Scope 2

Purchased Heating	2.01 MT
Purchased Electricity	0.21 MT
Electric-Powered Company Owned or Leased Vehicles	0.00 MT
Misc. Leased Asset Emissions	0.00 MT
Misc. Scope 2 Emissions	0.00 MT

Scope 3 Emissions

Scope 3

Category 1: Purchased Goods & Services	262.09 MT
Category 2: Capital Goods	0.00 MT
Category 3: Fuel & Energy Related Activities	0.71 MT
Category 4: Upstream Transportation & Distribution	2.73 MT
Category 5: Waste Generated in Operations	1.01 MT
Category 6: Business Travel	121.91 MT
Category 7: Employee Commuting	18.62 MT

Equivalencies

Total Emissions **410.99** MT

This is equivalent to:

Greenhouse gas emissions from:

1,046,609.00 Miles driven by an average gasoline-powered passenger vehicle

CO2 emissions from:

46,246.00 Gallons of gasoline consumed

55.00 Homes' energy use for one year

Greenhouse gas emissions avoided by:

145.00 Tons of waste recycled instead of landfilled

Carbon sequestered by:

412.00 Acres of U.S. forests in one year

2025 Emissions Tracking

The greenhouse gas emissions, or carbon footprint, are broken down and divided into the GHG Protocol's internationally accepted scope categories.

This footprint was calculated using data from your operational activities and includes summed conversions from CO_2, CH_4, N_2O, HFCs, PFCs, and SF_6 to CO_2, commonly referred to as CO_2e.

Total Emissions	MT CO_2e
Scope 1	1.69
Scope 2	2.23
Scope 3	407.08
Total Including Other	410.99
Total Excluding Other	410.99
Total for Offsetting (with assurance bonus)	452.09
